

## Infection Prevention It's in your Hands

**Please help us provide the best care possible by being  
involved with Your Care!**

- Using soap & water or alcohol rubs is one of the ways that helps us to prevent the spread of germs.
- Please observe our healthcare providers and staff to see they wash their hands or use the alcohol rub before providing your care.
- Take an active part in your care by completing this survey and placing it in the receptacle in the reception area or by returning it to the person who gave it to you.
