STUDY DESCRIPTION

GIVE PERSON STUDY DESCRIPTION AND SAY

I'd like you to follow along with me as I read the following statement. It describes the survey and assures the privacy to the fullest extent allowable by law of any information you provide. It also explains that your answers are used for statistical purposes only and that your participation is voluntary.

STUDY DESCRIPTION TEXT

Your address is one of several in this area randomly chosen for the U.S. Food and Drug Administration (FDA) Health and Media study. This study, sponsored by the

FDA, is collecting information from boys across the United States about their attitudes related to health, health behaviors, and advertisements they may have seen on TV and/or online.

You cannot be identified by any of the information you give to us. Your name and address will never be connected to your answers. Also, federal law requires that we keep all of your responses private to the fullest extent allowable by law. Any data you provide will only be used for statistical purposes and reported in aggregate form.

The screening questions take just a few minutes to determine if anyone in your household is eligible. One or possibly more children in your household may be asked to voluntarily participate in the survey. If anyone is chosen, the interview itself will take approximately 30-40 minutes. We would also like to ask you a few questions about your household's characteristics and media use. You and your child can refuse to answer any questions, and you can quit at any time. Your child will be offered \$20 upon completing the interview.

We will conduct three follow-up surveys every eight months to understand changes in health-related attitudes and behaviors over time. Each of these additional interviews will also be completely voluntary. If your child participates in future rounds, he or she will be offered a [INCENTIVE AMOUNT] incentive for participating in each of the three in-person interviews.

[FILL IF CAPI RESPONDENT: We are using a special quality control system on my laptop that will record what we say to each other to ensure I am following the correct procedures. The recording will be reviewed by RTI to monitor the quality of my work. The recordings will be deleted after my work has been reviewed and will be kept private just like all the other information you provide. You can still participate in the study even if you do not agree to this recording.

May we use this quality control recording system?

1=YES

2=NO

IF NO, DEACTIVATE AUDIO RECORDED INTERVIEWING FOR THIS SCREENER CASE]

If you have any questions about the study, please contact the project representative [ADD NAME], at [ADD NUMBER] extension [ADD EXTENSION]. If you have questions about your rights as a study participant, call toll-free: **RTI's Office of Human Research Protections** at 1-866-214-2043.

Thank you for your cooperation and time.

Programming Specifications 10-23-2015

Programmer Notes:

- Program should capture time/date stamp at start of survey.
- Section headings should not appear in the instrument.
- Variable names should not appear before the question on the screen. They should be in a corner and will be used for testing purposes.
- In the case of a table such as A1, variables A1_1- A1_10 could instead be numbered 1-5.
- Response option boxes (i.e.) are for display only. They should not have the number right next to it on the screen.
- In a table, when the header has "1 Definitely Yes," "2 Probably Yes," etc. make sure that the numbers do not appear in the instrument. These are for back-end purposes only.
- Only one question should appear per screen, except where there is a grid, or an intro.
- Make sure that all questions should fit in a screen. Respondents should not have to scroll on a given page.
- Make sure that the "Prefer not to answer" response is only shown when a respondent tries to skip a question. First, a soft check pop-up screen will appear that says "This question is important to the survey. If you meant to leave it blank, just continue. Otherwise, please answer it." After the screen shows up, show the response options with the "Prefer not to answer" option.
- Make sure that the "Prefer not to answer" response option is clearly marked that it is separate from the other response options. One way, we can do this is by having an extra space between the response options and the "Prefer not to answer" response option. See A2 as an example for single items. See A1 for table formats.
- Respondents may not move backward within a survey. The testing version of the survey should have a Previous button to allow testers to back up.
- Range checks will be a soft check unless otherwise noted.
- For all entries that are keyed numbers, only accept blank or numeric values. If an alpha is keyed and there is no specific numeric range check, please display hard check, "Please enter a number." Otherwise, the check will also include the valid numeric range.
- For all radio button questions, include an "uncheck" box.
- Respondents will be permitted to "pause" a survey at any point in the survey and then return to complete the survey at a later time. This should not have implications for programming.
- "Next" buttons will be displayed on every survey screen as appropriate.
- All images should be arranged in such a way that focus on usability and layout. Images should be aligned and of similar sizes as one another.
