

Attachment D: NCCCP Awardees Data Collection Instrument, Web Version

Form Approved
OMB No. 0920-0879
Expiration Date 01/31/2021

Thank you for participating in this assessment!

The Centers for Disease Control and Prevention's (CDC) Division of Cancer Prevention and Control (DCPC) funds the National Comprehensive Cancer Control Program (NCCCP DP17-1701). Recipients have been tasked with implementing a program to support cancer coalition efforts that leverage resources to plan and implement evidence-based strategies. These strategies promote the primary prevention of cancer, support cancer early detection efforts, address the needs of survivors, and promote health equity. DCPC is interested in assessing DP17-1701 recipients' 1) program capacity; 2) partner contributions; 3) intervention implementation; and 4) program outcomes. This assessment is being administered to program directors of NCCCP recipients. The findings from the assessment will be used to identify how CDC can make program improvements and assure a robust public health workforce.

Please respond to the questions according to your individual experience. We expect this assessment to take approximately 45 minutes to complete. Your responses to this assessment will be kept stored and maintained by ICF, without any identifying information. Individually identifiable responses will not be provided to CDC staff, and only aggregated information will be reported. Completion of this assessment is voluntary, but we encourage your participation.

If you have any questions about this survey, please contact Janice Vick at janice.vick@icf.com or [404-592-2296](tel:404-592-2296).

CDC estimates the average public reporting burden for this collection of information as 45 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0879).

The purpose of the questions in this section is to understand what factors have been important for your program's capacity to implement CCC program priorities, activities, and strategies.

CCC program priorities fall under four priority areas:

- 1) Address Primary Prevention
- 2) Support Early Detection
- 3) Address Needs of Cancer Survivors
- 4) Reduce Cancer Disparities

Activities fall under these categories:

- Program Collaboration – collaboration with chronic disease prevention and risk factor public health programs.
- External Partnerships – collaboration with comprehensive cancer control coalition, coalition member organizations, or other external partners that have a vested interest in cancer prevention and control
- Cancer Data and Surveillance – use of cancer data and public health surveillance data to inform program action
- Implement the Evidence-based Interventions – implement evidenced based interventions that facilitate environmental change, health systems transformation, or community clinical linkages that aim to reduce cancer risk, promote screening, and support cancer survivors
- Program Monitoring and Evaluation – conduct program monitoring and evaluation to articulate outcomes and stimulate program improvement

Strategies include:

- Environmental Approaches for Sustainable Cancer Control – actions that reduce risk and facilitate health behaviors through the enhancement of social and physical environments
- Community-Clinical Linkages to Aid Patient Support – efforts that increase the availability and utility of preventive health services and health extender services
- Health Systems Changes – interventions that increase efficiency and effectiveness of clinical care

The purpose of the questions in this section is to understand the way your partners have contributed to the implementation of your program, and any barriers you have encountered in working with partners.

Back

Next

For technical assistance, please email support@test.com.

When thinking of partners who have contributed most to your program's implementation of NCCCP priorities, how would you define their involvement with your program: [SELECT ONE FOR EACH PRIORITY]

	Address Primary Prevention	Support Early Detection	Address needs of cancer survivors	Reduce cancer disparities
Exchanging information or resources for mutual benefit	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mutually beneficial, co-planning activities for a common purpose	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Sharing resources for mutual benefit and a common purpose	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Working together to enhance the capacity of another for mutual benefit and common purpose	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

The next few questions ask about different types of partners. Please apply these definitions for those questions:

- **External partners:** Individuals or organizations that make up the coalition. Examples include nongovernmental organizations, academia, and professional organizations.
- **Internal partners:** Programs and entities within the health department. Examples include DP17-1701 programs, chronic disease programs, immunization programs, other surveillance programs.
- **Nontraditional partners:** Organizations or individuals without a public health or other health-related mission. Examples include business owners, transportation agencies, or other governmental or nongovernmental organizations that are not typically part of the coalition.
