

State of the State, Territory, and Tribal (S/T/T) Suicide Prevention Survey

Form Approved
OMB No. 0920-0879
Expiration Date 01/31/2021

This survey is meant for state, tribal, or territorial health department and behavioral health staff, grant managers, and coalition or advisory group leaders. It will help the Centers for Disease Control and Prevention's (CDC) Division of Violence Prevention conduct an environmental scan with all 50 states, Washington D.C., US territories and select tribes to understand how suicide prevention is addressed, now, and in the past five years. Your feedback is important to us and will help CDC's Division of Violence Prevention to improve suicide prevention technical assistance to states, territories, and tribes and develop recommendations to improve public health response to prevent suicide.

When you see "S/T/T", this refers to you if you are a representative of a state, Washington, DC, territory, or tribe. Completing the questionnaire is voluntary and takes approximately 30 minutes. CDC will not publish or share any identifying information about individual respondents. Data collected from this survey will be reported only in aggregate form. There are no known risks or direct benefits to you from participating or choosing not to participate, but your answers will help CDC improve state, tribal and territorial suicide prevention. As you complete the survey, you may find that you need to gather some information from your records. Also, you are able to move forward and backwards in the survey. You are able to exit the survey and return to complete it. If you have any questions or concerns about this assessment, please contact [Doryn Chervin](mailto:dchervin@getingears.com) (dchervin@getingears.com) or [Doriane Sewell](mailto:dsewell@getingears.com) (dsewell@getingears.com).

CDC estimates the average public reporting burden for this collection of information as 30 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0879).

I. About Your State/Territory/Tribe (S/T/T)

Throughout this survey, S/T/T refers to State, Territory or Tribe.

About your State/Territory/Tribe (S/T/T)

1. What is your State or Territory?

Select ▼

2. If you represent a Tribe, which one?

3. Within what S/T/T agency are you based?

Select ▼

If "Other S/T/T agency", specify which one:

4. If you are not based in a S/T/T agency, in what type of organization are you based?

5. Please describe your current responsibilities related to suicide prevention?

6. How long have you been in your current position?

Select ▼

7. How long have you worked in suicide prevention in total?

Select ▼

8. Are you the office suicide prevention coordinator or equivalent in your S/T/T?

Select ▼

IMPORTANT: Please click the "Finish Later" button in the bottom center of this page to get your unique response URL and pass code. These will be needed for you to return to the survey without losing your answers in case you drop your connection or experience an inactivity time-out . Thank you.

VII. Your State/Territory/Tribe (S/T/T's) Readiness for Suicide Prevention

35. Which category best describes your S/T/T's stage of readiness for suicide prevention action? (Select one)

Stage of Readiness	Description
<input type="checkbox"/> No Awareness	Suicide is not generally recognized by communities or leaders as a problem.
<input type="checkbox"/> Denial/resistance	There is little recognition that suicide might be occurring in one's community. The problem is seen as one faced by others, not locally.
<input type="checkbox"/> Vague awareness	Communities have minimal knowledge about their suicide and there is no immediate motivation or willingness to respond.
<input type="checkbox"/> Preplanning	There is recognition of the problem of suicide and the need to act. Some efforts are being considered, however, they are not yet focused or coordinated.
<input type="checkbox"/> Preparation	Leaders have emerged and are gathering information about the problem and having conversations with community members.
<input type="checkbox"/> Initiation	Information has been gathered, partners have convened, and plans are in place to begin prevention efforts.
<input type="checkbox"/> Stabilization	Activities are coordinated. Staff are trained and experienced. Partners meet routinely. Prevention efforts are ongoing and stable. Evaluation is being considered.
<input type="checkbox"/> Confirmation/Expansion	Prevention efforts are coordinated and ongoing with monitoring and evaluation. Community members feel comfortable using services and are supportive of prevention efforts. Efforts are underway to expand collaboration to related issues or risk factors. State/local data are regularly obtained.
<input type="checkbox"/> High level community ownership	Knowledge exists about the suicide problem, causes, and consequences in the community is widespread. Prevention is ongoing and coordinated and evaluation guides new directions.

Exit Survey

40. Which protective factors are you specifically addressing in your suicide prevention efforts?

- Promoting connectedness/social integration
- Building life skills (problem solving, coping, conflict resolution)
- Promoting tolerance of peoples' differences
- Promoting help-seeking
- Promoting cultural values that discourage suicide
- Promoting individuals' self-esteem
- Promoting a sense of purpose in peoples' lives
- Other
- Please Specify

41. Has your S/T/T's attention to particular risk and protective factors changed in the past five years?

- ✓ Select
- Yes
- No
- Not sure or Don't know

If yes, how:

IX. Existing Programs and Practices

In 2017, CDC released "Preventing Suicide: A Technical Package of Policy, Programs, and Practices" that describes the best available evidence for suicide prevention for states and communities

42. Are you familiar with this document?

The next few pages cover the seven evidence-based strategies found in the technical package. For each strategy, assess if your STT implements the strategy, and if so, check each of the approaches that are used and specify the program, practice, or policy.

Does your STT implement the strategy to:

Strengthen economic supports

(e.g. financial support after job loss, housing stabilization policies)

If Yes, which approaches are used?

Approaches to strengthen economic supports	Specify Program, Practice, or Policy
<input type="checkbox"/> Strengthen household financial security	<input type="text"/>
<input type="checkbox"/> Housing stabilization policies	<input type="text"/>
Other: <input type="text"/>	<input type="text"/>

The section below asks about your efforts to address the goals of the *2012 National Strategy for Suicide Prevention*

45. How much progress have you made toward each goal?

Goal 1: Integrate and coordinate suicide prevention activities across multiple sectors and settings	<input checked="" type="checkbox"/>	Rate each from 1 to 5 where: 1 = "No progress" 2 = "Little progress" 3 = "Moderate progress" 4 = "A lot of progress" 5 = "Goal achieved"
Goal 2: Implement research-informed communication efforts designed to prevent suicide by changing knowledge, attitudes, and behaviors	<input type="checkbox"/>	
Goal 3: Increase knowledge of the factors that offer protection from suicidal behaviors and that promote wellness and recovery	<input type="checkbox"/>	
Goal 4: Promote responsible media reporting of suicide, accurate portrayals of suicide and mental illnesses in the entertainment industry, and the safety of online content related to suicide	<input type="checkbox"/>	
Goal 5: Develop, implement, and monitor effective programs that promote wellness and prevent suicide and related behaviors	<input type="checkbox"/>	
Goal 6: Promote efforts to reduce access to lethal means of suicide among individuals with identified suicide risk	<input type="checkbox"/>	
Goal 7: Provide training to community and clinical service providers on the prevention of suicide and related behaviors	<input type="checkbox"/>	
Goal 8: Promote suicide prevention as a core component of health care services	<input type="checkbox"/>	
Goal 9: Promote and implement effective clinical and professional practices for assessing and treating those identified as being at risk for suicidal behaviors	<input type="checkbox"/>	
Goal 10: Provide care and support to individuals affected by suicide deaths and attempts to promote healing and implement community strategies to help prevent further suicides	<input type="checkbox"/>	
Goal 11: Increase the timeliness and usefulness of national surveillance systems relevant to suicide prevention and improve the ability to collect, analyze, and use this information for action	<input type="checkbox"/>	
Goal 12: Promote and support research on suicide prevention	<input type="checkbox"/>	
Goal 13: Evaluate the impact and effectiveness of suicide prevention interventions and systems and synthesize and disseminate findings	<input type="checkbox"/>
