

Form Approved
OMB No. 0920-0879
Expiration Date 01/31/2021

Thank you for agreeing to participate in the National Indian Health Board (NIHB) Tribal Public Health in Indian Country Capacity Scan. The information you share with the NIHB will be used to develop a report that will support and guide essential tribal public health service work in the areas of public health practice, technical support, and assessment of issues related to improving Indian health. This scan expands and builds upon a similar capacity assessment titled *"2010 Tribal Public Health Profile: Exploring Public Health Capacity in Indian Country"*. It will provide a more recent, comprehensive picture of the capacity of public health in Indian Country. **Participation of each tribal health department in this capacity scan is critical to put forth a comprehensive picture of public health in Indian Country.**

There are a total of 129 questions about the types of public health activities occurring within the community you serve. You may enter and exit the assessment as often as necessary to complete the questionnaire accurately. The estimated time to complete the assessment is 60 minutes.

At the end of the questionnaire, there is an opportunity to provide feedback to NIHB. Your feedback is encouraged as it will improve future assessments and scans of this nature. Given the diversity and uniqueness across tribal settings, some of the questions may not be worded in a manner that reflects the work that is occurring at your site. If this is the case, please feel free to use the text box at the end of the questionnaire to provide relevant information related to the tribal community you serve.

All responses will be kept secure, and results will be reported only in aggregate form. Data from this scan will be analyzed and published in a national-level report and made available on NIHB's website. NIHB will report the findings of this scan from a national perspective; however, your tribal health entity will have access to your own data, which will allow you to compare your results to a national aggregate, and perhaps regionally, if you choose to share your data in your area.

PLEASE COMPLETE AND SUBMIT ALL OF YOUR RESPONSES BY [DATE].

This questionnaire falls under the work of a cooperative agreement between the Centers for Disease Control and Prevention and the National Indian Health Board. Through this agreement, the intent of this questionnaire is to inform tribal leaders and communities, and federal agencies on the overall scope of public health in Indian Country.

Your participation in this assessment is voluntary and you can stop the process at any time. All information will be shared and reported in aggregate form

If you have any questions, would like assistance, or would like to complete the scan over the phone, please contact Stephen Valliere at svalliere@nihb.org or 202-507-4082.

Participants and other stakeholders may access the results at www.nihb.org, once data collection and analysis are completed.

CDC estimates the average public reporting burden for this collection of information as 60 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333, ATTN: 191A (0920-0679).

National Indian Health Board 

Data entry can be completed in one or multiple sittings. As you complete the questionnaire online, all responses are automatically saved and can be changed at any time, up to clicking the final **SAVE** and **CONTINUE** button.

To exit the scan and return to it at a later time, simply close your browser. When you access the scan again, you will be directed to the last page accessed when you were working on the scan. Please note, only one person can be logged in to the scan at the same time.

Demographic / Background Information

Providing this information will aid NIHB's efforts to accurately describe who receives public health services from Tribal entities.

Who receives **public health** services provided by Tribal Org? (check all that apply)

- Enrolled members of any federally recognized Tribe(s) within Tribal Org's service area
- Non-enrolled members of a federally recognized Tribe(s) (such as eligible dependents or descendants who receive benefits)
- Members of a state recognized Tribe
- Non-Indians (non-Indians living in a specified geographic area, Veterans, spouses, Tribal employees, etc.)
- Other

How many individuals does Tribal Org provide public health services to in a calendar year? Public health services may include providing immunizations and disease screenings, or providing outreach and education materials to the community-at-large, such as at a health fair.

Is Tribal Org? a **direct service Tribe**?

- Yes
- No
- Don't know / Unsure

What is the maximum distance (in miles) an individual within your service area would have to travel to access the nearest non-Tribal (city, county or state) public health department?

- 0 to 25 miles
- 25 to 50 miles
- 50 to 75 miles
- 75 miles to 100 miles
- Greater than 100 miles

How many states overlap the Tribal Org's service area?

- 1 state
- 2 states
- 3 states

How many non-Tribal (city, county or state) public health departments are located within your organization's service area?

- 1 non-Tribal health department
- 2 - 5 non-Tribal health departments
- 6 - 10 non-Tribal health departments
- More than 10 non-Tribal health departments
- Don't know / Unsure

The following questions ask about **assessment, performance improvement, and accreditation** activities offered in the Tribal Org's service area

Has Tribal Org developed a community health assessment? By "health assessment" we mean the systematic collection and analysis of data and information for use in educating and mobilizing communities, developing priorities, garnering resources or using resources in different ways, adopting or revising policies, and planning actions to improve the population's health.

- Yes, within the last five years
- Yes, but more than five years ago
- Yes, currently in development
- No, but plan to in the next year
- No

Has Tribal Org developed or participated in developing a community health improvement plan for your community? A community health improvement plan is a long-term, systematic effort to address public health problems on the basis of the results of community health assessment activities and the community health improvement process.

- Yes, within the last five years
- Yes, but more than five years ago
- Yes, currently in development
- No, but plan to in the next year
- No

Do you have a community health improvement plan that was developed using the results of a community health assessment?

- Yes
- No

Do you plan to update your community health improvement plan within the next three years?

- Yes
- No

Has Tribal Org developed an organizational strategic plan?

- Yes, within the last five years
- Yes, but more than five years ago
- Yes, currently in development
- No, but plan to in the next year
- No

Does Tribal Org use the core competencies for public health professionals developed by the Council on Linkages in any of the following ways? (select all that apply)

- Assessing staff training needs
- Conducting staff performance evaluations
- Developing staff training plans
- Writing position descriptions
- Other
- No

Which of the following statements best characterizes your Tribal Org current quality improvement activities? (select only one)

- We have implemented a formal quality improvement program entity-wide
- Formal quality improvement activities are being implemented in specific areas but not on an entity-wide basis
- The entity's quality improvement activities are informal or ad-hoc in nature
- The entity is not currently involved in quality improvement activities

[Previous Section](#)

[Table of Contents](#)

[Save and Continue](#)

What is the status of 's implementation of its quality improvement plan?

- Not yet implemented
- Implemented in the last year
- Implemented more than one year ago; a written evaluation on progress toward quality improvement plan goals, objectives, or targets
- Implemented more than one year ago, with one or more completed written evaluations on progress toward quality improvement plan goals, objectives, or targets

Has Tribal Org developed an performance management system?

- Yes, within the last five years
- Yes, but more than five years ago
- Yes, currently in development
- No, but plan to in the next year
- No

Which of the following best describes Tribal Org's participation in the Public Health Accreditation Board's (PHAB's) national public health accreditation program.

- Tribal Org has achieved accreditation
- Tribal Org is in the process of formally applying (i.e., has registered in e-PHAB and is submitting an application, uploading documentation, preparing for a site visit, etc.)
- Tribal Org plans to apply but has not yet submitted an application
- Tribal Org has not decided whether to apply for accreditation
- Tribal Org is not familiar with accreditation
- PHAB accreditation is not applicable

The next set of questions is about the Tribal Org's communication strategies and registries.

How did Tribal Org communicate public health information to your Tribal community in the past year? (check all that apply)

- Social Media (Facebook, Twitter)
- Website
- Text Alerts
- Tribal Newsletter
- Email
- Radio
- Direct Mailing
- Posters
- Billboards
- In-Person Interaction
- Other

Indicate if Tribal Org has any of the following registries.

Public Health Workforce

Providing this information will aid efforts to understand the public health workforce needs in Indian Country.

Please indicate the current number of public health staff members (for example: staff providing public health services such as prevention, rather than staff providing clinical services and treating illness after onset) please include temporary and contract workers. Please also provide this information expressed as the number of full time equivalent (FTE) public health staff members in Tribal Org. A full-time equivalent works 40 hours a week in public health and should be counted as 1.0 FTE. An employee who works 20 hours a week on public health activities should be counted as one 0.5 FTE. So, you could have 5 staff members (people) who make up 4.5 FTEs (4 people are 1.0 FTEs and one person is a 0.5 FTE)

Number of staff members

Number of full time equivalent (FTE)

In the below table, please indicate Tribal Org current number of positions funded in each occupational classification listed. Employees who provide or support public health services in each of these classifications should be listed in full time equivalent (FTE) units.

An employee who works 40 hours a week on public health activities should be counted as 1.0 FTE. An employee who works 10 hours a week on public health should be counted as .25 FTE.

NOTE: Column (total FTE positions funded (c) should equal the sum of funded FTE positions filled (d) and funded FTE positions vacant, i.e., (c) = (d) + (e)

	Total Number of FTE Positions Funded	Number of FTE Positions Filled	Position Status		How Many Additio Funded FTEs A Needed
