

REQUEST FOR DETERMINATION OF RESEARCH STATUS

To be completed by the staff member with lead responsibility for the project and approved by branch chief (if applicable) and Division ADS.
A separate PGO funding memo is required if project is research and involves human subjects regardless of the CDC staff role.

- Instructions:
- (1) Use this form to declare: (a) the research status of any project, (b) role or roles of CDC staff
 - (2) A short summary should be attached offering specific details about the project and the role of staff.
 - (3) Be sure to complete all applicable items, obtain appropriate signatures and submit this form for approval.

Tracking Number: CIOSP 2305
 (Use PGO number if cooperative agreement, grant, etc.)

Date submitted: 01/16/2013

Title of Project: Comprehensive Cancer Control Branch Management Information System

Dates for project period:

Beginning: 01/01/2013
 Ending: 12/31/2017

Dates for funding (if applicable):

Beginning: _____
 Ending: _____

Project is (choose one):

NOTE: Revision, as used below, refers to any substantive change made to the project including scope of project, funding restrictions, personnel, role of CDC staff member, determination of research status, etc.

- New Revision
 Continuation, without revision(s) Continuation, with revision(s)

Lead staff member:

Name: CONOLA STEELE
 User ID: CKS9
 Scientific Ethics number: 6803

Contact information:

Division: DCPC
 Telephone: 770-488-4261
 Mailstop: K57

Please indicate your role(s) in this project:

- Project officer Technical monitor
 Principal investigator Investigator
 Consultant Other (please explain)

1. Are any or all of the activities within this project DESIGNED to contribute to generalizable knowledge (i.e., research)?

- YES NO

If YES, list those activities which are research:

2. Is this CDC project research or public health practice (check all that apply)?

- Research Public health practice
- Check one: Check all that apply:
- Human subjects involved Emergency Response Surveillance
 Human subjects not involved Program evaluation Other (please explain) Reporting of progress reports and submission of continuation applications

3. If RESEARCH involving human subjects, has the project or research activities been reviewed by the CDC IRB for human subjects protection?

- a. NO, New project, not yet reviewed d. YES, Reviewed and approved by CDC
 b. NO, Existing project, not ready to submit If YES, please list protocol number _ and expiration date _____
 c. NO, Submitted for approval e. NO, RESEARCH, no CDC investigators (CDC IRB not required)
f. N/A (Not Applicable)

If RESEARCH, list any other CDC staff involved in this project, please include the name, role, and scientific ethics number

Name	Role (project officer, investigator, consultant, etc.)	Scientific ethics number Prin
------	--	-------------------------------

IF YOU THINK THE RESEARCH PROJECT MIGHT QUALIFY AS EXEMPT RESEARCH (as identified in 45CFR46.101), PLEASE ANSWER questions 4-6, OTHERWISE SKIP TO question 7.

4. Does the proposed research involve prisoners?
 YES If YES, this research cannot be exempted and must be reviewed by an IRB (skip to question 7).
 NO
5. Does the proposed research involve fetuses, pregnant women, or human in vitro fertilization as targets (such that Subpart B would apply)?
 YES If YES, this research cannot be exempted and must be reviewed by an IRB (skip to question 7).
 NO

Educational Research

- 6.1 Is this research conducted in established or commonly accepted educational settings, AND does the research involve normal educational practices (e.g., research on regular and special education strategies or research on the effectiveness of, or comparison among instructional techniques, curricula or classroom management methods)?
 YES NO

Research Involving Surveys, Interview Procedures (including Focus groups), Observation of Public Behavior, or Educational Tests

- 6.2 Will this research use educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior?
 YES NO If NO skip to 6.3
- Will children (<18 years of age) be research subjects?
 YES If YES, this research cannot be exempted and must be reviewed by an IRB (skip to item 7)
 NO

- 6.2.1 Is the information obtained recorded in such a manner that human subjects can be identified directly or indirectly through identifiers (such as a code) linked to the subjects?
 YES NO

- 6.2.2 Will any disclosure of the human subjects' responses outside of the research setting have the potential to place the subjects at risk of criminal or civil liability, or be damaging to the subjects' financial standing, employability or reputation? (Examples here may include: the collection of sensitive data regarding the subjects' (or relatives' or associates') possible substance abuse, sexuality, criminal history or intent, medical or psychological condition, financial status, or similarly compromising information).
 YES NO

- 6.3 Will this research use educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures, or observation of public behavior but the research is not exempt under paragraph 6.2 of this section:
 YES NO If NO skip to 6.4
- 6.3.1 Will this research involve human subjects that are elected or appointed public officials or candidates for public office?
 YES NO
- 6.3.2 Does federal statute(s) require(s) without exception that confidentiality of the personally identifiable information will be maintained throughout the research and thereafter? (Note: CDC can use this exemption criterion only in the case where a 308(d) Assurance of Confidentiality has been obtained to cover the research).
 YES NO

Existing Data Which Is Publicly Available or Unidentifiable

- 6.4 Does this research involve only the collection or study of existing* data, documents, records, pathological or diagnostic specimens? (* 'existing' means existing before the study begins)?
 YES NO If NO skip to 7
- 6.4.1 Is this material or information publicly available?
 YES NO
- 6.4.2 Is this material or information recorded in such a manner by the investigator that the subjects cannot be identified directly or indirectly through identifiers linked to the subjects?
(Note: If a link is created by an investigator even temporarily, for research purposes, this criterion is not met. If a temporary link is created by clinical staff who already have access to the data, this criterion is met).
 YES (there are no identifying information and no unique identifiers or codes)
 NO (there are identifiers (including codes))

7. Please prepare and attach a short summary paragraph (<1 page);
if this is new:

- a. Be sure to include the purpose of the project, specific details about the project and the role of the CDC staff member(s) in the project. In explaining one's role as a consultant be particularly careful to identify involvement in things like: study design decisions, oversight of protocol development, participation in review of data collection procedures, and participation in data analysis and/or manuscript preparation, as well as whether there will be access to identifiable or personal data.
- b. Explain your project status selection (research--non-exempt, exempt, no CDC investigator or not involving human subjects; public health practice). If you selected research not involving human subjects be sure to indicate if the data includes any personal information (e.g., name, SSN), linkable study identification numbers or codes, or geographical information.

The purpose of this project is to continue using an electronic information system (Management Information System [MIS] for Comprehensive Cancer Control Programs, OMB No. 0920-0841) to maintain grantee-specific information for the National Comprehensive Cancer Control Program (NCCCP). Since January 2010, NCCCP awardees have submitted progress and activity information to CDC twice per year using this system. New cooperative agreements were awarded to all NCCCP programs in 2012, which place emphasis on policy and environmental approaches to cancer prevention and control. Minor changes to the existing data elements will be implemented to reflect the FOA's new performance requirements. Thirteen of the 65 NCCCP awardees received additional funding for related but distinct cooperative agreements that aim to accelerate the development of policy and environmental approaches to cancer control. Similar semi-annual progress reports are required to monitor activities under this demonstration program. CDC proposes to use the same MIS-based methodology for all reporting. This project is not research. The MIS data collection instrument does not collect personally identifiable information or sensitive data.

8. Please list the primary project site and all collaborating site(s).

Explanation of project components:

9. If project involves research that is funded extramurally, list amount of award that should be restricted pending IRB approval and describe which project components will be affected, if known:
