

PRIVACY THRESHOLD ANALYSIS (PTA)

This form is used to determine whether a Privacy Impact Assessment is required.

Please use the attached form to determine whether a Privacy Impact Assessment (PIA) is required under the E-Government Act of 2002 and the Homeland Security Act of 2002.

Please complete this form and send it to your component Privacy Office. If you do not have a component Privacy Office, please send the PTA to the DHS Privacy Office:

Senior Director, Privacy Compliance
The Privacy Office
U.S. Department of Homeland Security
Washington, DC 20528
Tel: 202-343-1717

PIA@hq.dhs.gov

Upon receipt from your component Privacy Office, the DHS Privacy Office will review this form. If a PIA is required, the DHS Privacy Office will send you a copy of the Official Privacy Impact Assessment Guide and accompanying Template to complete and return.

A copy of the Guide and Template is available on the DHS Privacy Office website, www.dhs.gov/privacy, on DHSConnect and directly from the DHS Privacy Office via email: pia@hq.dhs.gov, phone: 202-343-1717.

SPECIFIC PTA QUESTIONS

1. Reason for submitting the PTA: Renewal PTA

The Federal Emergency Management Agency’s (FEMA) Federal Insurance and Mitigation Administration (FIMA) administers grant programs for states and localities that seek to implement activities and projects in order to reduce or eliminate risk of future damage to life or property. The Hazard Mitigation Grant Program (HMGP) is one such program. The key purpose of HMGP is to ensure that the opportunity to take critical mitigation measures to reduce the risk of loss of life and property from future disasters is not lost during the reconstruction process following a disaster. This PTA is being conducted pursuant to the triennial review requirement. There have been no changes or updates to the system that impact FEMA’s collection, use, maintenance, or sharing of personally identifiable information (PII) since the last PTA was approved by the DHS Privacy Office on December 9, 2011.

HMGP information is collected and maintained in the HMGP IT system. The IT system collects and stores grant applications for applicants and sub-applicants associated with a Presidential major disaster declaration. Applicants are the states involved in the disaster. Sub-applicants can include state agencies, Indian Tribal governments, local governments or communities, and private non-profit organizations. As part of the application process, applicants/co-applicants provide property and property owner’s information as supporting documentation. Applicants/co-applicants submit property owner information, which includes PII, with the consent of the property owner. The application information includes notations and reports of decisions from insurance, disaster, or similar financial aid and/or income from other Federal and State agencies; insurance companies; employer; bank; financial or credit data service; and public or private entities as they relate to payments and/or financial assistance received by individual property owners for property included in the grant application. HMGP shares this information with the FEMA Enterprise Data Warehouse (EDW) for storage and report creation purposes. The FEMA EDW is covered under the DHS/FEMA/PIA-026 – Operational Data Store and Enterprise Data Warehouse Privacy Impact Assessment (PIA).

2. Does this system employ any of the following technologies:

If you are using any of these technologies and want coverage under the respective PIA for that technology please stop here and contact the DHS Privacy Office for further guidance.

- Closed Circuit Television (CCTV)
- Social Media
- Web portal¹ (e.g., SharePoint)
- Contact Lists
- None of these

3. From whom does the Project or Program collect, maintain, use, or

- This program does not collect any personally identifiable information²

¹ Informational and collaboration-based portals in operation at DHS and its components that collect, use, maintain, and share limited personally identifiable information (PII) about individuals who are “members” of the portal or “potential members” who seek to gain access to the portal.

³ When data is sent over the Internet, each unit transmitted includes both header information and the actual data being sent. The header identifies the source and destination of the packet, while the actual data is referred to as the payload. Because header information, or overhead data, is only used in the transmission process, it is stripped from the packet when it reaches its destination. Therefore, the payload is the only data received by the destination system.

⁴ PII may be shared, received, or connected to other DHS systems directly, automatically, or by manual processes. Often, these systems are listed as "interconnected systems" in Xacta.

| The purpose of this PTA is to review and document the review of the HMGP System in accordance with the triennial review requirement. This system has not undergone any changes since it was last adjudicated on December 11, 2011. The HMGP System is a Privacy Sensitive System. The system collects business-related PII of State and Local representatives and the PII of property owners. Personal information of property owners; specifically, property information, flood insurance coverage and history is provided to FEMA as part of the HMGP grant application process and is provided to FEMA by grant | |
