<p>The 2012/17 Beginning Postsecondary Students Longitudinal Study (BPS:12/17) is conducted by the National Center for Education Statistics (NCES), within the U.S. Department of Education (ED). BPS is designed to follow a cohort of students who enroll in postsecondary education for the first time during the same academic year, irrespective of the date of high school completion. Data from BPS are used to help researchers and policymakers better understand how financial aid influences persistence and completion, what percentages of students complete various degree programs, what are the early employment and wage outcomes for certificate and degree attainers, and why students leave school. The request to conduct the BPS:12/17 full-scale data collection was approved by OMB in December 2016 (1850-0631 v.10) with change requests approved in January, February, and April 2017 (OMB# 1850-0631 v.11-14). This request is to: (1) use specific incentive strategies with the main BPS:12/17 sample, based on recent modeling using study nonrespondents, and (2) make minor modifications to the BPS:12/17 instrument facsimile, specifically to the instructions displayed on a form used to collect information when a response fails the security question.</p>
