## Overview

This appendix provides a facsimile of the High School Longitudinal Study of 2009 (HSL:09) student records instrument. As part of NCEs' initiative to align the data elements requested from institutions across studies (thereby reducing burden on participating institutions), the HSL:09 student records instrument has been designed to be consistent with other upcoming student records instruments – specifically, NPSAS:16 and BPS student records collections.

A preliminary student records instrument was approved for HSL:09 (OMB #0850-0582 v.18) and for use in BPS qualitative evaluation interviews (OMB #1850-0803 v.152). These interviews took place in June and July of 2016 and were intended to assess the usability of the student records instrument when adapted for a multiyear collection, identify any challenges presented by collecting data elements across several academic years, and identify strategies for reducing burden on participating institutions. The BPS qualitative evaluation instrument was consistent with the student records instrument approved for HSL:09, and the results of the evaluation interviews were used to improve the instruments for both studies.

The facsimile presented in this appendix represents updates made based on the results of the qualitative evaluation, and is consistent with the student records instrument submitted as part of the BPS:12/17 full-scale package (OMB #1850-0631 v.10). Table 1 provides a summary of the changes to the content of the instrument when compared to the instrument originally cleared for HSL:09. The table includes color coding to indicate whether items have remained the same (black), were revised (purple), removed (red), or added (green). Changes from the previously approved instrument are intended to reduce respondent burden and improve data quality. The instrument was also revised to include data elements for the 2011-2012; these items are exact duplicates of the parallel items from academic years 2012-2013 through 2016-2017. This academic year was added for two reasons: first, to make the HSL:09 and BPS instruments completely consistent; second, to reduce potential confusion for institutions that are participating in HSL:09 and BPS student record collections simultaneously; and third, to allow for the collection of postsecondary data for those HSL:09 study members that began their postsecondary careers earlier than most other students in their cohort.

## PRA statement

The following PRA statement will be included on the data collection website:

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control numbers for the voluntary information collections using this website are listed below. The time required to complete the information collections is estimated to average the number of minutes or hours listed below per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection.

If you have any comments concerning the accuracy of the time estimate, suggestions for improving the collections, or any comments or concerns regarding the status of your individual submission of these data, please write to: Postsecondary Data Portal studies, National Center for Education Statistics, PCP, 550 12th St., SW, 4th floor, Washington, DC 20202.
