

63237) extending the ACAS pilot period through July 26, 2014, and reopening the application period through December 23, 2013. On July 28, 2014, CBP published a notice in the **Federal Register** (79 FR 43766) extending the ACAS pilot period through July 26, 2015, and reopening the application period through September 26, 2014. Finally, on July 27, 2015, CBP published a notice in the **Federal Register** (80 FR 44360) extending the ACAS pilot period through July 26, 2016, and reopening the application period through October 26, 2015.

Each extension of the pilot period and reopening of the application period has allowed for a significant increase in the diversity and number of pilot participants. The current pilot participants now represent a strong sample size of the air cargo community and new pilot participants will not be accepted.

CBP intends to issue a notice of proposed rulemaking to incorporate ACAS as an ongoing regulatory program taking into account the results of the pilot and has begun work on that process. CBP would like the pilot to continue during the rulemaking process. This will provide continuity in the flow of advance air cargo security information and serve as a stop-gap measure to address the vulnerability of the air cargo supply chain identified by the October 2010 Yemen cargo plot. CBP would also like to provide pilot participants with the additional opportunity to adjust and test business procedures and operations in preparation for the forthcoming rulemaking.

For these reasons, CBP is extending the ACAS pilot period through July 26, 2017.

Dated: July 19, 2016.

*OMB Approval Number:* None.

*Type of Request:* This is a new request.

*Form Number:* None.

*Description of the need for the information and proposed use:* The information is being collected to explore and document the effectiveness and value of HUD’s Energy Performance Contracting (EPC) program. EPCs are an innovative financing technique designed to provide Public Housing Authorities (PHAs) with cost-effective energy improvements that are installed with little or no up-front expenditures, wherein the costs of the improvements are typically borne by the performance contractor and repaid using a portion of the cost savings resulting from the improvements. HUD has approved approximately 315 EPCs, totally nearly

\$1.5 billion in investments, since this type of financing began in the 1980s. EPCs have been executed in all ten HUD Regions and in very small (less than 250 units) to very large (more than 6,599 units) PHAs; however to date, no substantive review of the program’s performance has been conducted. The proposed data collection instrument is a web-based survey that will be supported by follow-up telephone interviews to a subset of the study’s participants.

*Respondents (i.e. affected public):* Employees of housing organizations receiving funding from HUD, specifically public housing authorities.

*Estimated Number of Respondents:* 492 (consisting of PHAs that have: (1) Executed an EPC, (2) begun the EPC application process but didn’t execute the EPC, and (3) never been associated with an EPC),

*Estimated Number of Responses:* 394 (based on an 80% response rate, web survey or telephone interviews).

*Frequency of Response:* 1.

*Average Hours per Response:* 0.79 (weighted average).

*Total Estimated Burdens:* 312.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
