Application to Use Burden/Hours from Generic PRA Clearance: Medicaid and CHIP State Plan, Waiver, and Program Submissions (CMS-10398, OMB 0938-1148)

### Information Collection #11 MAGI-Based Eligibility Verification Plan

November 2017

Center for Medicaid and CHIP Services (CMCS) Centers for Medicare & Medicaid Services (CMS)

### A. Background

The Centers for Medicare & Medicaid Services (CMS) work in partnership with States to implement Medicaid and the Children's Health Insurance Program (CHIP). Together these programs provide health coverage to millions of Americans. Medicaid and CHIP are based in Federal statute, associated regulations and policy guidance, and the approved State plan documents that serve as a contract between CMS and States about how Medicaid and CHIP will be operated in that State. CMS works collaboratively with States in the ongoing management of programs and policies, and CMS continues to develop implementing guidance and templates for States to use to elect new options available as a result of the Affordable Care Act or to comply with new statutory provisions. CMS also continues to work with States through other methods to further the goals of health reform, including program waivers and demonstrations, and other technical assistance initiatives.

# **B. Description of Information Collection**

Regulations at 42 CFR 435.945(j) and 457.380(j), require states to develop, and update as modified, a verification plan describing the verification policies and procedures adopted by the agency in accordance with §§435.940-435.965, and 457.380. The attached verification plan template is for states to describe their verification policies and procedures for individuals whose eligibility is based on Modified Adjusted Gross Income (MAGI). States may use one template for both Medicaid and separate CHIP programs if the verification policies and procedures are the same. If they are different, the State should submit two separate verification plans.

## **C. Deviations from Generic Request**

No deviations are requested.

## **D. Burden Hour Deduction**

The total approved burden ceiling of the generic ICR is 86,240 hours, and CMS previously requested to use 15,700 hours, leaving our burden ceiling at 70,540 hours. CMS estimates that each State will complete the collection of data and submission to CMS within 40 hours. There is a potential universe of 56 respondents, so the total burden deducted from the total for this request is 2,240 hours.

#### Wage Estimate

To derive average costs, we used data from the U.S. Bureau of Labor Statistics' May 2016 National Occupational Employment and Wage Estimates for all salary estimates (<u>http://www.bls.gov/oes/current/oes\_nat.htm</u>). In this regard, the following table presents the mean hourly wage, the cost of fringe benefits (calculated at 100 percent of salary), and the adjusted hourly wage.

Occupation Title	Occupation Code	Mean Hourly Wage (\$/hr)	Fringe Benefit (\$/hr)	Adjusted Hourly Wage (\$/hr)
Business Operations Specialist	13-1199	35.99	35.99	71.98

As indicated, we are adjusting our employee hourly wage estimates by a factor of 100 percent. This is necessarily a rough adjustment, both because fringe benefits and overhead costs vary significantly from employer to employer, and because methods of estimating these costs vary widely from study to study. Nonetheless, there is no practical alternative and we believe that doubling the hourly wage to estimate total cost is a reasonably accurate estimation method.

In aggregate, we estimate 2,240 hours (56 responses x 40 hours) at a cost of \$161,235.20 (2,240 hrs x \$71.98/hr).

### Attachment

The following attachment is provided for this information collection:

Attachment A – Verification Plan Template

#### <u>E. Timeline</u>

Not applicable. This is an extension of a currently approved GenIC.
