Overview

States are required to demonstrate, and Centers for Medicare and Medicaid Services (CMS) has accepted a reasonable Payment Limit (UPL) based on a comparison of Medicaid (MCD) payments to equivalent Medicare (MCR) payment of Medicare principles. CMS has developed guidance documents to help states meet statutory and regulatory requirements downloaded from:

<http://www.medicaid.gov/medicaid-chip-program-information/by-topics/financing-and-reimbursement/accountability>

CMS is also introducing templates specific to each service and demonstration type, which have been developed to address requirements and increase comparability across states. This workbook contains templates for the nursing facility UPL

For each facility, please complete one of the following templates:

- **NF Cost** for cost-based demonstrations (e.g., routine per diem x Medicaid covered days)
- **NF RUGs** for Medicare Resource Utilization Groups (RUGs) -based demonstrations (acuity adjusted price-based demonstration)
- **NF Per Diem** for alternative demonstrations (e.g., case-mix adjusted Medicare payment per diem x Medicaid covered days)

States may apply different UPL formulas for state government owned or operated facilities, non-state government owned facilities and private facilities; however, the formula should be consistently applied to each provider within the category. Each facility should only be included in one type of UPL demonstration. **In filling out these templates, data for each individual facility should be included on a separate row. Additionally, all supplemental payments made by the state should be reported for each facility reported separate from regular Medicaid payments.** There may be instances where a variable is not applicable to your facility. Please leave these variables blank.

Information Requested:

Within each nursing facility UPL template, CMS requests the following information for each nursing facility:

- **Demonstration Information** asks for basic information such as the state, demonstration rate year, service type (nursing facility), demonstration type (cost, RUGs, Per Diem)
- **Provider Identification** asks for provider identification numbers and names for each facility included, the ownership (state government owned, non-state government owned, state-government owned), and whether the facility is classified as urban or rural
- **Medicare Cost, RUGs, or Other Data for Base Period** asks for Medicare base year data relevant to the calculation of the UPL
- **Medicaid Payment and Utilization Data for Base Period** asks for Medicaid utilization data used to calculate the UPL and Medicaid payment data that is used to determine whether or not the state has made payments in excess of the UPL
- **Medicaid Payments Inflated to Demonstration Year** asks for inflationary or volume adjustment data that are made to account for changes in the Medicaid program that have occurred between the base and current rate year periods
- **UPL Calculation & Inflation to Demonstration Year** instructs the state to calculate the UPL and asks for inflationary or volume adjustment data to appropriately trend UPL data from the base to the current rate year
- **Adjustments to UPL** asks for other adjustments to the UPL that are not included in the UPL calculation (e.g., provider specific adjustments, demonstrations)
- **Calculation of UPL Gap** instructs the state to calculate the UPL gap for each facility by subtracting (adjusted/inflated UPL) from the calculated UPL

Payment and Cost Data: Enter to the nearest dollar (i.e. \$1,234,567.89 should be entered as \$1,234,568)

Proportion and Percentage Data: Enter with no more than four decimal places (i.e., 0.12345 should be entered as 0.1234)

Detailed descriptions for each variable are provided in the next sheet labeled "Data Dictionary." A hypothetical n also been entered for each template to provide guidance regarding the data requested for each column.
