This is a summary document about MSSICS Appeals screens. It contains screen facsimiles, notes about each screen, and links to MSOM sections.

The screens shown are those used when there is an active claim iteration in MSSICS. If the claim was not processed using MSSICS, Direct Update is used to record high level summary appeal information. Information about Direct Update is found in [MSOM BUSSR 002.007](#) and following.

The screens are shown in full path order, as if every possible screen could be present for an appeal iteration. Most appeal iterations are very short. For example, a typical request for reconsideration for an initial disability issue contains only five screens.

MSOM contains a comprehensive introductory chapter to MSSICS Appeals in [MSOM MSSICS 020.001](#).

The screen facsimiles are from the MSSICS Detailed Functional Requirements. The key to the screen values is:

Notes:

- Appeal Late Filing (ALAT) documents late filing development and disposition for an appeal request.
- ALAT is presented when the system calculates that the appeal request was not filed within the allowed time period.
- The system takes into account weekends and holidays that are standard known federal holidays. It cannot take into account extraordinary non-work days. You must recognize and take into account extraordinary non-work days.

Examples:

- The appeal period ends on Saturday. The system displays the date of the following Monday.
 - The appeal period ends on Thanksgiving. The system displays the date of the Friday following Thanksgiving.
 - A federal holiday is declared for the day of the funeral of a former President. The system does not recognize this as a holiday and continues to display this date in this field.

- Jurisdiction and Status (AJAS) collects information about the jurisdiction and status of the appeal iteration.
- Workload management systems control the appeal iteration independent of the claim iteration. AJAS collects your unit and office code designation for the appeal iteration. These determine where the appeal iteration information appears on listings.
- AJAS collects your determination about the appeal iteration status. Status information on AJAS determines when Disposition (ADIS) is presented in the path.
- Referral information is also collected on AJAS. When you indicate that the appeal request has been referred to a Disability Determination Service (DDS) site, the system notifies the National Disability Determination Services System (NDDSS).
- When you indicate that the appeal request has been referred to a DDS site or to an Office of Disability Adjudication and Review site, it is assumed that you are forwarding the request with the case folder. The system notifies SSI Control System (SSICS) of the movement.
- AJAS is presented in all appeal iterations.
