### THRIVE Collaboration Assessment Tool

#### Welcome

This survey will assess your experience working with collaborative members in the THRIVE demonstration project.

In order to describe and disseminate the lessons learned from THRIVE, we need to understand your success in building and maintaining partnerships in the THRIVE collaborative. We also need to assess how these partnerships contributed to achieving THRIVE's goals. This survey examines collaborative context, membership, processes, and other information related to the THRIVE collaboratives. It should take less than 30 minutes to complete. Your responses are confidential. After the survey is complete you will receive \$50 monetary compensation for your time.

- While completing this survey, please keep in mind the key THRIVE goals:
  - To increase use of pre-exposure prophylaxis (PrEP) and non-occupational post-exposure prophylaxis (nPEP) by gay, bisexual, and other men who have sex with men (MSM) of color
  - To optimize the HIV care continuum to increase the number of MSM of color who are virally suppressed

**Throughout this survey "collaborative" or "collaborative member" refers to your agency or organization and "community" or "community member" refers to MSM of color.**

**Questions about success, challenges, facilitators, and barriers refer to those of the THRIVE collaborative rather than specific HIV prevention or care services.**

Thank you for your feedback!
