

CDC 57.500 (Front) Rev 8, V8.8

Outpatient Dialysis Center Practices Survey

Form Approved OMB No. 0920-0666 Exp. Date:11/30/2019 www.cdc.gov/nhsn

Complete this survey as described in the Dialysis Event Protocol.

Instructions: This survey is only for dialysis centers that provide in-center hemodialysis. If your center offers only home dialysis, please complete the Home Dialysis Center Practices Survey. Complete one survey per center. Surveys are completed for the current year. It is strongly recommended that the survey is completed in February of each year by someone who works in the center and is familiar with current practices within the center. Complete the survey based on the actual practices at the center, not necessarily the center policy, if there are differences. For complete instructions on the survey questions, please see the "Instructions for the Outpatient Dialysis Center Practices Survey" document available at: http://www.cdc.gov/nhsn/dialysis/dialysis-event.html#dcf.

*required to save as complete Page 1 of 9 *Survey Year: Facility ID #: ESRD Network #: A. Dialysis Center Information A.1. General What is the ownership of your dialysis center? (choose one) *1. ☐ Government ☐ Not for profit ☐ For profit *2. a. What is the location/hospital affiliation of your dialysis center? (choose one) ☐ Freestanding ☐ Hospital based ☐ Freestanding but owned by a hospital b. If hospital-based or hospital-owned, is your center affiliated with a teaching hospital? □ No *3. a. What types of dialysis services does your center offer? (select all that apply) ☐ In-center daytime ☐ In-center nocturnal ☐ Peritoneal dialysis ☐ Home hemodialysis hemodialysis hemodialysis b. What patient population does your center serve? (select one) ☐ Pediatric only ☐ Adult only ☐ Mixed: adult and pediatric *4. How many in-center hemodialysis stations does your center have? *5. Is your center part of a group or chain of dialysis centers? ☐ Yes □ No a. If yes, what is the name of the group or chain? *6. Do you (the person primarily responsible for collecting data for this survey) perform patient ☐ Yes □ No care in the dialysis center? *7. Is there someone at your dialysis center in charge of infection control? ☐ Yes □ No a. If yes, which best describes this person? (if >1 person in charge, select all that apply) ☐ Hospital-affiliated or other infection control practitioner comes to our unit ☐ Dialysis nurse or nurse manager ☐ Dialysis center administrator or director ☐ Dialysis education specialist ☐ Patient care technician ☐ Other, specify: *8. Is there a dedicated vascular access nurse/coordinator (either full or part-time) at your center? ☐ No ☐ Yes Assurance of Confidentiality: The voluntarily provided information obtained in this surveillance system that would permit identification of any individual or institution is collected with a guarantee that it will be held in strict confidence, will be used only for the purposes stated, and will not otherwise be disclosed or released without the consent of the individual, or the institution in accordance with Sections 304, 306 and 308(d) of the Public Health Service Act (42 USC 242b, 242k, and 242m(d)). Public reporting burden of this collection of information is estimated to average 2.05 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0666)

C. Vac	ccines							
*27.	Of the MAINTENANCE, NON-TRANSIENT in-center hemodialysis PATIENTS from question 19a:							
	a. How many were hepatitis B surface ANTIGEN (HBsAg) positive in the first week of February?							
	 i. Of these patients who were hepatitis B surface ANTIGEN (HBsAg) positive in the first week of February, how many were positive when first admitted to your center? 							
	b. How many patients converted from hepatitis B surface ANTIGEN (HBsAg) negative to positive during the prior 12 months (i.e., in the past year, how many patients had newly acquired hepatitis B virus infection; not as a result of vaccination)? Do not include patients who were antigen positive before they were first dialyzed in your center:							
*28.	In the past year, has your center had ≥1 hemodialysis patient who reverse seroconverted ☐ Yes (i.e., had evidence of resolved hepatitis B infection followed by reappearance of hepatitis B surface antigen)?	□ No						
D.2. He	epatitis C							
*29.	Does your center routinely screen hemodialysis patients for hepatitis C antibody (anti-HCV) \square Yes on admission to your center? (<i>Note: This is NOT hepatitis B core antibody</i>)	⊐ No						
*30.	Does your center routinely screen hemodialysis patients for hepatitis C antibody (anti-HCV) \Box Yes at any other time?	□ No						
	If yes, how frequently?							
	☐ Twice annually ☐ Annually ☐ Other, specify:							
*31.	Of the MAINTENANCE, NON-TRANSIENT in-center hemodialysis patients counted in question 19a,							
	a. How many were hepatitis C antibody positive in the first week of February?							
	 i. Of these patients who were hepatitis C antibody positive in the first week of February, how were positive when first admitted to your center? 	many						
	b. How many patients converted from hepatitis C antibody negative to positive during the prior 12 months (i.e., in the past year, how many patients had newly acquired hepatitis C infection)? Do not include patients who were anti-HCV positive before they were first dialyzed in your center:

E. Dial	E. Dialysis Policies and Practices							
E.1. Dialyzer Reuse								
*32.	Does y	es your center reuse dialyzers for any patients?						
	If yes,							
	a.	Of the MAINTENANCE, NON-TRANSIENT in-center hemodialysis patients counted in 1 them participate in dialyzer reuse?	9a, how m	any of				
	b.	Does your center routinely test reverse osmosis (R.O.) water from the reuse room for \Box Yes \Box No culture and endotoxin whenever a reuse patient has a pyrogenic reaction?						
	C.	Of all reused dialyzers at your center, how many undergo refrigeration prior to reprocess	sing?					
		□ All □ Most □ Some □ Few □ No	one					
	d.	Is there a limit to the number of times a dialyzer is used?						
		☐ Yes (indicate number):						
		□ No limit as long as dialyzer meets certain criteria (e.g., passes pressure leak test, e						
	e.	Of all reused dialyzers in your center, how many of them have sealed (non-removable) h		s?				
	£	□ All □ Most □ Some □ Few □ No	ne					
	f.	Where are dialyzers reprocessed?						
		 □ Dialyzers are reprocessed at our center only □ Dialyzers are transported to an off-site facility for reprocessing only 						
		☐ Both at our center and off-site						
		If any dialyzers are reprocessed at the facility,						
		i. How is dialyzer header cleaning performed? (select all that apply)						
		☐ Automated machine (e.g., RenaClear® System)						
	☐ Spray device (e.g., ASSIST® header cleaner)							
	☐ Insertion of twist-tie or other instrument to break up clots							
	☐ Disassemble dialyzer to manually clean							
		☐ Other, specify:						
		☐ No separate header cleaning step performed						
		ii. How are dialyzers reprocessed?						
		☐ Automated reprocessing equipment						
		☐ Manual reprocessing						
E.2. Di	alysate							
*33.	What ty	pe of dialysate is used for in-center hemodialysis patients at your center? (choose one)						
		Conventional						
	□ l	Jltrapure						
*34.	Does v	our center routinely test the following whenever a patient has a pyrogenic reaction?						
	a.	Patient blood culture	□ Yes	□ No				
	b.	Dialysate from the patient's dialysis machine	□ Yes	□ No				
F.3. Pr	iming Pr	• • •						
*35.	-	our center use hemodialysis machine Waste Handling Option (WHO) ports?	☐ Yes	□ No				
*36.	-	patients in your center "bled onto the machine" (i.e., where blood is allowed to reach	□ Yes	□ No				
00.		est reach the prime waste receptacle or WHO port)?						

Form Approved OMB No. 0920-0666 Exp. Date: www.cdc.gov/nhsn

E.6. Pr	evention Activities (continued)					
	b. If yes, is your center actively participating in any of the following prevention initiatives (sel	ect all that	apply):			
	□ CDC Making Dialysis Safer for Patients Coalition – facility-level participation □ CDC Making Dialysis Safer for Patients Coalition – corporate- or other organization- □ The Standardizing Care to improve Outcomes in Pediatric Endstage Renal Disease Collaborative Peritoneal Dialysis Catheter-related Infection Project □ SCOPE Collaborative Hemodialysis Access-related Infection Project	•	ipation			
*44.	☐ None of the above In the past year, has your center's medical director participated in a leadership or educational activity as part of the American Society of Nephrology's (ASN) Nephrologists Transforming Dialysis Safety (NTDS) Initiative?	□ Yes	□ No			
*45.	Does your center follow <u>CDC-recommended Core Interventions</u> to prevent bloodstream infection hemodialysis patients? ☐ Yes, all ☐ Yes, some ☐ No, none	ns in				
*46.	Does your center perform hand hygiene audits of staff monthly (or more frequently)?	□ Yes	□ No			
*47.	Does your center perform observations of staff vascular access care and catheter accessing practices quarterly (or more frequently)?	□ Yes	□ No			
*48.	Does your center perform staff competency assessments for vascular access care and catheter accessing annually (or more frequently)?	□ Yes	□ No			
E.7. Pe	eritoneal Dialysis					
*49.	For peritoneal dialysis catheters , is antimicrobial ointment routinely applied to the exit site during dressing change?	□ Yes	□ No			
	a. If yes, what type of ointment is most commonly used? (select one)☐ Gentamicin					
	☐ Mupirocin					
	☐ Povidone-iodine					
	☐ Bacitracin/polymyxin B (e.g., Polysporin®)					
	☐ Bacitracin/neomycin/polymyxin B (triple antibiotic)					
	☐ Bacitracin/gramicidin/polymyxin B (Polysporin® Triple)					
	☐ Other, specify:					
F. Vas	cular Access					
F.1. Ge	eneral Vascular Access Information					
*50.	Of the MAINTENANCE, NON-TRANSIENT hemodialysis patients from question 19 (19a + 19b) received hemodialysis through each of the following access types during the first week of Febru		/			
	a. AV fistula:	y.				
	b. AV graft:					
	c. Tunneled central line:					
	d. Nontunneled central line:					
	e. Other vascular access device (e.g., catheter-graft hybrid):					
F.2. Ar	teriovenous (AV) Fistulas or Grafts					
*51.	*51. Before prepping the fistula or graft site for rope-ladder cannulation, what is the site most often <u>cleansed</u> with? ☐ Soap and water ☐ Alcohol-based hand rub ☐ Antiseptic wipes ☐ Other, specify: ☐ ☐ Nothing					
	— эоар ани water — Alconor-based hand rub — Antiseptic wipes — — Other, specify.	⊔ Г	vouiling			

F.2. Art	eriovenous (AV) Fistulas or Grafts (continued)					
*52.	Before rope-ladder cannulation of a fistula or graft, what is the site most often <u>prepped</u> with? (select one)					
	□ Alcohol					
	☐ Chlorhexidine without alcohol					
	☐ Chlorhexidine with alcohol (e.g., Chloraprep®, Chlorascrub™)					
	☐ Povidone-iodine (or tincture of iodine)					
	☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) without alcohol					
	☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) followed by alcohol					
	☐ Other, specify:					
	□ Nothing					
	a. What form of this skin antiseptic is used to prep fistula/graft sites?					
	☐ Multiuse bottle (e.g., poured onto gauze)					
	☐ Pre-packaged swabstick/spongestick					
	☐ Pre-packaged pad					
	☐ Other, specify:					
	□ N/A					
*53.	How many of the fistula patients in your center undergo buttonhole cannulation?					
55.	□ All □ Most □ Some □ None					
	If any,					
	a. Which fistula patients undergo buttonhole cannulation?					
	□ In-center hemodialysis patients only					
	☐ Home hemodialysis patients only					
	□ Both					
	If any in-center hemodialysis patients undergo buttonhole cannulation,					
	b. When buttonhole cannulation is performed for in-center hemodialysis patients:					
	i. Who most often performs it?					
	□ Nurse					
	☐ Patient (self-cannulation)					
	☐ Technician					
	☐ Other, specify:					
	 Before cannulation, what is the buttonhole site most often prepped with? (select the one most commonly used) 					
	□ Alcohol					
	☐ Chlorhexidine without alcohol					
	\square Chlorhexidine with alcohol (e.g., Chloraprep®, Chlorascrub TM)					
	☐ Povidone-iodine (or tincture of iodine)					
	☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) without alcohol					
	☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) followed by alcohol					
	☐ Other, specify:					
	□ Nothing					
	iii. Is antimicrobial ointment (e.g., mupirocin) routinely used at buttonhole ☐ Yes ☐ No cannulation sites to prevent infection?					

	г.э. п	modialysis Cameters	
	*54.	Before accessing the hemodialysis catheter, what are the catheter hubs most commonly prepped with? (select one)	
a .		□ Alcohol	
b.		☐ Chlorhexidine without alcohol	
Э.		☐ Chlorhexidine with alcohol (e.g., Chloraprep®, Chlorascrub™)	
J.		□ Povidone-iodine (or tincture of iodine)	
∍. │		☐ Sodium hypochlorite solution (e.g., Alcavis) without alcohol	
		☐ Sodium hypochlorite solution (e.g., Alcavis) followed by alcohol	
g.		□ Other, specify:	
า.		□ Nothing	
		a. What form of this antiseptic/disinfectant is used to prep the catheter hubs?	
		☐ Multiuse bottle (e.g., poured onto gauze)	
k.		☐ Pre-packaged swabstick/spongestick	
		☐ Pre-packaged pad	
m.		☐ Other, specify:	
n.		□ N/A	
Э.	*55.	Are catheter hubs routinely scrubbed after the cap is removed and before accessing the catheter (or before accessing the catheter via a needleless connector device, if one is used)? \Box Yes \Box No	
q.	*56.	When the catheter dressing is changed, what is the exit site (i.e., place where the catheter enters the skin) most commonly prepped with? (select one) Alcohol	
s.		☐ Chlorhexidine without alcohol	
		☐ Chlorhexidine with alcohol (e.g., Chloraprep®, Chlorascrub™)	
u.		☐ Povidone-iodine (or tincture of iodine)	
v.		☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) without alcohol	
w.		☐ Sodium hypochlorite solution (e.g., ExSept®, Alcavis) followed by alcohol	
х.		☐ Other, specify:	
y.		□ Nothing	
		a. What form of this antiseptic/disinfectant is used at the exit site?	
		☐ Multiuse bottle (e.g., poured onto gauze)	
		☐ Pre-packaged swabstick/spongestick	
		☐ Pre-packaged pad	
		☐ Other, specify:	
		□ N/A	
	*57.	For hemodialysis catheters , is antimicrobial ointment routinely applied to the exit site during dressing change? Yes No N/A – chlorohexidine-impregnated dressing is routinely used a. If yes, what type of ointment is most commonly used? (select one)	
		☐ Bacitracin/gramicidin/polymyxin B (Polysporin® Triple) ☐ Gentamicin	
		☐ Bacitracin/polymyxin B (e.g., Polysporin®) ☐ Mupirocin	
		☐ Bacitracin/neomycin/polymyxin B (triple antibiotic) ☐ Povidone-iodine	
		☐ Other, specify:	
	*58.	What is the job classification of staff members who <u>most often</u> perform hemodialysis catheter care (i.e., access catheters or perform exit site care) in your center? (select one)	
		□ Nurse □ Technician □ Other, specify:	
L			—
