

Justification for Non-material change

OMB control number 1235-0016, expiration date 11/30/2018

Form Number WH-514

The Wage and Hour Division has discovered that OSHA regulations prohibit fire extinguishers (with 1 ½ quart Carbon Tetrachloride) as described in the Form WH-514 item #21 instructions. OSHA regulations at 1910.157(c)(3) prohibits employers from providing portable fire extinguishers using Carbon Tetrachloride. The Wage and Hour Division has made the correction as shown so the form no longer conflicts with OSHA regulations as described.

A track changes version of the form has been uploaded as a supplemental document to this ICR for ease of review, and the final instrument uploaded under the IC list screen.
