<b>Program change</b>		NA
<b>Adjustment</b>		NA
<b>Other change**</b>		
<p>The Trends in International Mathematics and Science Study (TIMSS) is an international assessment of fourth and eighth grade students' achievement in mathematics and science. Since its inception in 1995, TIMSS has continued to assess students every 4 years, with the next TIMSS assessment, TIMSS 2019, being the seventh iteration of the study. TIMSS provides a comparison of U.S. student performance with those of their international peers in mathematics and science at grades 4 and 8. TIMSS is coordinated by the International Association for the Evaluation of Educational Achievement (IEA), an international collective of research organizations and government agencies that creates the assessment framework, assessments, and background questionnaires and provides procedures and technical standards which all countries must follow. In the U.S., the National Center for Education Statistics (NCES) conducts TIMSS. In preparation for the TIMSS 2019 main study, NCES will conduct a field test in 2018 to evaluate new assessment items and background questions, to ensure practices that promote low exclusion rates, and to ensure that classroom and student sampling procedures proposed for the main study are successful. The U.S. TIMSS 2019 field test recruitment began in May 2017, with data collection conducted from March through April 2018. The U.S. TIMSS 2019 main study recruitment will begin in May 2018, with data collection conducted from March through May 2019. The request for the Main Study Recruitment and Field Test was approved in July 2017 (OMB# 1850-0695 v.10), with an Update to that request currently in a 30-day public comment period and under review at OMB, awaiting OMB approval (OMB# 1850-0695 v.11). This request is to provide the final U.S. versions of the TIMSS 2019 field test questionnaires approved by IEA. The IEA released the final international versions of the TIMSS 2019 field test questionnaires in November 2017, and has approved the adaptations to be made to the U.S. versions of the field test questionnaires. The request under review (OMB# 1850-0695 v.11) includes the final international versions of the TIMSS 2019 field test questionnaires along with draft U.S. adaptations to these questionnaires. In Appendix C.2, this change request provides the final adapted U.S. versions of the TIMSS 2019 field test questionnaires to be administered in the main study. In addition, Appendix C.1, which lists the changes that were made to the U.S. versions of the TIMSS 2015 main study questionnaires in preparation for the U.S. TIMSS 2019 field test study, was updated to reflect all of the final changes.</p>
