

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

Docket No. IC18-7-000 (FERC-725L)

ERRATA NOTICE

(April 24, 2018)

The Commission issued 60-day¹ and 30-day² notices on 1/22/2018 and 4/11/2018 respectively, for the renewal of the FERC-725L (Mandatory Reliability Standards for the Bulk-Power System: MOD Reliability Standards) information collection. Both notices request comments on FERC-725L and indicate the Commission will submit the information collection to the Office of Management and Budget (OMB) for review.

This Errata Notice adds data related to MOD-031-2 Reliability Standard which was inadvertently omitted from those public notices, and corrects the total burden and cost for FERC-725L. The additional data and corrected totals follow:

Reliability Standard MOD-031-2 (Demand and Energy Data), included in FERC-725L						
Reliability Standard MOD-031-2	Number and Type of Respondents (1)	Annual Number of Responses per Respondent (2)	Total Number of Responses (1)*(2)=(3)	Avg. Burden & Cost Per Response³ (4)	Total Annual Burden Hours & Total Annual Cost (3)*(4)=(5)	Cost per Respondent (5)÷(1)
(On-going) Develop summary in accordance with Requirement R1, Subparts 1.5.4 and 1.5.5.	561 (DP, LSE, TP and/or BA)	1	561	8 hrs.; \$545	4,488 hrs.; \$305,723	\$545

The corrected total annual estimated burden and cost for the FERC-725L information collection (including Reliability Standard MOD-031-2, noted above) is 35,208 hours and \$2,377,376 respectively.

Kimberly D. Bose,
Secretary.

¹ 83 FR 3699, 1/26/2018

² 83 FR 17171, 4/18/2018

³ The estimate uses the average hourly wage (plus benefits) of \$68.12/hour for electrical engineers (Occupation Code: 17-2071) from the Bureau of Labor Statistics.
