Security Settings for the Tool

(Pour des instructions en français, faites défiler vers la droite.-->)

In order to run this application, you must have macros enabled.

For Excel 2007, Excel 2010, and Excel 2013 Users: (If you are using Excel 2003, please scroll down.)

If an "Options..." button appears in the menu bar above, follow these instructions:

1. **Click the Options button.** This button appears after the Security Warning in the Excel 2007 menu bar.
2. **Enable content.** In the Microsoft Office Security Options dialog box, choose "Enable this content" and click OK.

If the "Options..." button does not appear, use the instructions below. [**NOTE:** If you do not have a round button in the top left corner of the screen (see image below), you are probably using an earlier version of Excel, in which case you need to scroll to the instructions below.)

1. **Click the Office button.** This button appears in the top left corner of the screen in Excel 2007/2010.
2. **Go to Excel Options.** Click the "Excel Options" button in the bottom right corner of the pull-down menu.

3. **Go to the Trust Center.** On the Excel Options screen, click on *Trust Center* in the left navigation pane.
4. **Go to the Trust Center Settings.** Click on *Trust Center Settings* in the bottom right portion of the screen.
5. **Change security settings.** Choose the setting "Disable all macros **with notification**" and click OK.
6. **Reopen the file.** Close the Excel file and then re-open it.

For Excel 2003 Users:

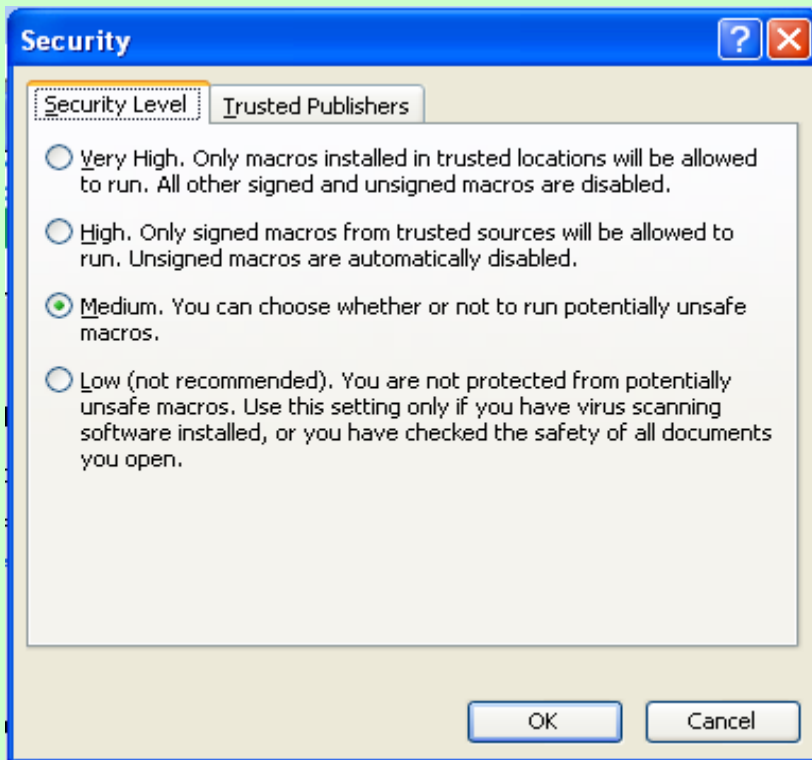

You have reached this screen either because you clicked "Disable Macros" or because your security settings are set to "Disable all macros with notification." To enable macros, simply close this file and reopen it, selecting "Enable Macros" instead.

If you were not given the choice to enable or disable macros, then you will first need to change your security settings.

1. **Open the Security dialog box.** In Excel 2003, on the menu bar, go to Tools > Macro > Security Level

2. **Set your Excel security setting level to “Medium.”** In the Security dialog box, choose Medium and

3. **Close and re-open the file.** Close this file. If prompted to save changes, click No. Re-open the file.

4. **Enable macros.** When prompted with the Security Warning dialog box, click the Enable Macros button

Macros may contain viruses. It is usually safe to disable macros, but if the macros are legitimate, you might lose some functionality.
