Dear Chris,

I have reviewed attachments P-U related to OMB package #0920-0900. The proposed changes do not impact the original determination (#082114CB) that the Ebola contact tracing activities do not meet the definition of research.

Further, I confirm that all other documents included in this package pertain to activities that are within the scope of DGMQ's statutory authority to monitor/prevent the introduction of infectious diseases into the US, and to monitor/prevent the spread of infectious diseases between states. These activities are routine public health practice, and they do not meet the regulatory definition of research.

Thanks,
Laura
