Objectives and Need for Assistance. Precisely describe any relevant physical, economic, social, financial, institutional or other problems requiring a solution. Supporting documentation or other testimonies from concerned interests other than the applicant may be used. Any relevant data based on planning studies should be included or footnoted.

Results and Benefits Expected. Identify results and benefits to be derived. For example, show how the facility will be used. For land acquisition or developmental projects, explain how the project will benefit the public.

Approach. Outline a plan of action pertaining to the scope of the project and detail how the proposed work will be accomplished for each assistance program. Cite factors which might accelerate or decelerate the work and your reasons for taking this approach as opposed to others. Describe any unusual features of the project, such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvements. Provide for each assistance program quantitative projections of the accomplishments to be achieved, if possible. When accomplishments cannot be quantified, list the activities in chronological order to show the schedule of accomplishments and their target dates. Identify the kinds of data to be collected and maintained, and discuss the criteria to be used to evaluate the results and success of the project. Explain the methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved. List each organization, cooperator, consultant or other key individuals who will work on the project along with a short description of the nature of their effort or contribution.
