

Justification for no material or nonsubstantive change to a currently approved collection

EIA would like to modify the instructions for Form EIA-757 “Natural Gas Processing Plant Survey.” A sentence was added on page 1 under Part 1 Plant Identification of the Instructions to read:

“If the plant does not have a recognizable address, you may report the address in the form of latitude and longitude coordinates.”

This sentence was added so that respondents could provide the coordinates in case there was no street mailing address for the facility.
