* APFO CUSTOM AERIAL PRODUCTS AND SERVICES

Depending on the original film scale or digital resolution, custom print scales will vary depending on coverage area, paper size, and printer limitations. Custom aerial prints are defined as a single image requiring geospatial layer(s) or a mosaic of multiple images that may or may not require geospatial layer(s). Digital film scans are available in TIF format and may require geospatial services to provide a custom aerial print of historical imagery. APFO utilizes Quarter Quad (QQ) and Compressed County Mosaic (CCM) products from the National Agriculture Imagery Program (NAIP). For special needs not covered elsewhere on this form, contact us directly. Additional fees may apply.

* OTHER IMAGERY

Imagery secured for the Forest Service (FS) and National Resource Conservation Service (NRCS) can be purchased from us by the same procedures outlined for FSA photography. The negative scales vary from 1:6,000 to 1:80,000, depending on the project area. Most FS photography has been flown in natural color, some in black and white and color infrared. Most NRCS photography has been flown in black and white, some in natural color and color infrared.
