SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Under the paperwork requirements specified by paragraph (c) of the Standard, an employer must certify that his or her workers have been trained as specified by the training provision of

the Standard. Specifically, employers must prepare a certification record which includes the identity of the person trained, the signature of the employer or the person who conducted the training, and the date the training was completed. The certification record shall be prepared at the completion of training and shall be maintained on file for the duration of the employee's employment. The information collected will be used by employers as well as by compliance officers to determine whether employees have been trained according to the requirements set forth in 29 CFR 1910.268(c).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply. For example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Telecommunications (29 CFR 1910.268). The burden hours have decreased based on the reduced number of telecommunication workers installing and repairing lines and equipment from 215,810 to 205,360. Therefore, the Agency is proposing to decrease the existing burden hour estimate for the collection of information requirements specified by the Standard from 4,532 to 3,765 (difference of 767 hours). The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Telecommunications (29 CFR 1910.268).

OMB Control Number: 1218-0225.

Affected Public: Business or other for-profits.

Number of Respondents: 35,742.

Frequency of Responses: On occasion.

Average Time Per Response: Various.

Estimated Total Burden Hours: 3,765.

Total Responses: 205,360.

Estimated Cost (Operation and Maintenance): \$0.
