<p>The School Survey on Crime and Safety (SSOCS) is a nationally representative survey of elementary and secondary school principals that serves as the primary source of school-level data on crime and safety in public schools. SSOCS is the only recurring federal survey collecting detailed information on the incidence, frequency, seriousness, and nature of violence affecting students and school personnel from the school's perspective. Data are also collected on frequency and types of disciplinary actions taken for select offenses; perceptions of other disciplinary problems, such as bullying, verbal abuse and disorder in the classroom; the presence and role of school security staff; parent and community involvement; staff training; mental health services available to students; and, school policies and programs concerning crime and safety. Prior administrations of SSOCS were conducted in 2000, 2004, 2006, 2008, 2010, and 2016. The 2018 and 2020 SSOCS full-scale data collections were approved in July 2017 with the latest change request approved in September 2017 (OMB# 1850-0761 v.12-14). This request is to send to all nonresponding principals, regardless of whether they were assigned to be offered the paper or the web version of the questionnaire, an email reminder that provides the option to complete the survey online.</p>
