

**SUPPORTING STATEMENT
ENVIRONMENTAL PROTECTION AGENCY**

**NESHAP for Friction Materials Manufacturing
(40 CFR Part 63, Subpart QQQQ) (Amendments)
February 2018**

Part A of the Supporting Statement

1. Identification of the Information Collection

1(a) Title of the Information Collection

NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQ) (Amendments), EPA ICR Number 2025.08, OMB Control Number 2060-0481.

1(b) Short Characterization/Abstract

The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the regulations published at 40 CFR Part 63, Subpart QQQQ were proposed on October 4, 2001 and promulgated on October 18, 2002. These regulations apply to existing and new friction materials manufacturing facilities that use a solvent-based process and that are major sources of hazardous air pollutant (HAP) emissions. Major sources of HAP emissions are sites that emit, or have the potential to emit, any single HAP at a rate of 9.07 megagrams (10 tons) or more per year or any combination of HAPs at a rate of 22.68 megagrams (25 tons) or more per year. An affected source is each new, reconstructed, or existing solvent mixer at the subject facility. New sources are those that commenced construction or reconstruction after October 18, 2002. This information is being collected to assure compliance with 40 CFR Part 63, Subpart QQQQ.

In general, all NESHAP require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. Owners/operators are also required to maintain records of the occurrence and duration of any failures to meet applicable standards, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP. A semiannual report is also required.

Any owner/operator subject to the provisions of this part shall maintain a file containing these documents, and retain the file for at least five years following the generation date of such maintenance reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the United States Environmental Protection Agency (EPA) regional office.

All of the friction materials manufacturing facilities in the United States are owned and operated by the friction materials manufacturing industry (the "Affected Public"). None of the facilities in the United States are owned by state, local, tribal or the Federal government. They

are all privately-owned, for-profit businesses. We assume that they will all respond. The “burden” to the “Affected Public” may be found below in Table 1: Annual Respondent Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Renewal). The “burden” to the Federal Government is attributed entirely to work performed by either Federal employees or government contractors and can be found below in Table 2: Average Annual EPA Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Renewal).

Over the next three years, approximately 2 respondents per year will be subject to the standard, and no additional respondents per year will become subject to the standard. This estimate is based on information from EPA’s internal expert.

The active (previous) ICR had the following Terms of Clearance (TOC):

OMB files this comment in accordance with 5 CFR 1320.11(c) of the Paperwork Reduction Act and is withholding approval of this collection at this time. This OMB action is not an approval to conduct or sponsor an information collection under the Paperwork Reduction Act of 1995. The agency shall examine public comment in response to the Notice of Proposed Rulemaking and will include in the supporting statement of the next ICR, to be submitted to OMB at the final rule stage, a description of how the agency has responded to any public comments on the ICR. This action has no effect on any current approvals.

There has not been any proposed rulemaking since promulgation of the rule in 2002 and no comments have been submitted to the docket since promulgation (comments received on the initial proposed rule were responded to during final rulemaking at 67 FR 64498). Therefore, no action was required by EPA to address the TOC.

2. Need for and Use of the Collection

2(a) Need/Authority for the Collection

The EPA is charged under Section 112 of the Clean Air Act, as amended, to establish standards of performance for each category or subcategory of major sources and area sources of hazardous air pollutants. These standards are applicable to new or existing sources of hazardous air pollutants and shall require the maximum degree of emission reduction. In addition, section 114(a) states that the Administrator may require any owner/operator subject to any requirement of this Act to:

- (A) Establish and maintain such records; (B) make such reports;
- (C) install, use, and maintain such monitoring equipment, and use such audit procedures, or methods; (D) sample such emissions (in

accordance with such procedures or methods, at such locations, at such intervals, during such periods, and in such manner as the Administrator shall prescribe); (E) keep records on control equipment parameters, production variables or other indirect data when direct monitoring of emissions is impractical; (F) submit compliance certifications in accordance with Section 114(a)(3); and (G) provide such other information as the Administrator may reasonably require.

In the Administrator's judgment, HAP emissions from solvent mixers at friction materials manufacturing facilities cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, the NESHAP were promulgated for this source category at 40 CFR Part 63, Subpart QQQQ.

2(b) Practical Utility/Users of the Data

The recordkeeping and reporting requirements in the standard ensure compliance with the applicable regulations which were promulgated in accordance with the Clean Air Act. The collected information is also used for targeting inspections and as evidence in legal proceedings.

Performance tests are required in order to determine an affected facility's initial capability to comply with the emission standard. Continuous emission monitors are used to ensure compliance with the standard at all times. During the performance test a record of the operating parameters under which compliance was achieved may be recorded and used to determine compliance in place of a continuous emission monitor.

The notifications required in the standard are used to inform the Agency or delegated authority when a source becomes subject to the requirements of the regulations. The reviewing authority may then inspect the source to check if the pollution control devices are properly installed and operated, leaks are being detected and repaired, and the standard is being met. The performance test may also be observed.

The required semiannual reports are used to determine periods of excess emissions, identify problems at the facility, verify operation/maintenance procedures and for compliance determinations.

3. Nonduplication, Consultations, and Other Collection Criteria

The requested recordkeeping and reporting are required under 40 CFR Part 63, Subpart QQQQ.

3(a) Nonduplication

If the subject standards have not been delegated, the information is sent directly to the appropriate EPA regional office. Otherwise, the information is sent directly to the delegated state

or local agency. If a state or local agency has adopted its own similar standards to implement the Federal standards, a copy of the report submitted to the state or local agency can be sent to the Administrator in lieu of the report required by the Federal standards. Therefore, no duplication exists.

3(b) Public Notice Required Prior to ICR Submission to OMB

An announcement of a public comment period for the renewal of this ICR was published in the Federal Register (82 FR 29552) on June 29, 2017. No comments were received on the burden published in the Federal Register.

3(c) Consultations

The Agency has consulted industry experts and internal data sources to project the number of affected facilities and industry growth over the next three years. The primary source of information as reported by industry, in compliance with the recordkeeping and reporting provisions in the standard, is the Integrated Compliance Information System (ICIS). ICIS is EPA's database for the collection, maintenance, and retrieval of compliance data for industrial and government-owned facilities. The growth rate for the industry is based on our consultations with the Agency's internal industry experts.

Industry trade associations and other interested parties were provided an opportunity to comment on the burden associated with the standard as it was being developed and the standard has been previously reviewed to determine the minimum information needed for compliance purposes. In developing this ICR, we contacted both: 1) the Motor and Equipment Manufacturers Association (MEMA) at (202) 393-6362; and 2) Dynax America Corporation at (540) 966-6010.

It is our policy to respond after a thorough review of comments received since the last ICR renewal as well as those submitted in response to the first Federal Register notice. In this case, no comments were received.

3(d) Effects of Less Frequent Collection

Less frequent information collection would decrease the margin of assurance that facilities are continuing to meet the standards. Requirements for information gathering and recordkeeping are useful techniques to ensure that good operation and maintenance practices are applied and emission limitations are met. If the information required by these standards was collected less frequently, the proper operation and maintenance of control equipment and the possibility of detecting violations would be less likely.

3(e) General Guidelines

These reporting or recordkeeping requirements do not violate any of the regulations promulgated by OMB under 5 CFR Part 1320, Section 1320.5.

These standards require the respondents to maintain all records, including reports and notifications for at least five years. This is consistent with the General Provisions as applied to the standards. EPA believes that the five-year records retention requirement is consistent with the Part 70 permit program and the five-year statute of limitations on which the permit program is based. The retention of records for five years allows EPA to establish the compliance history of a source, any pattern of non-compliance and to determine the appropriate level of enforcement action. EPA has found that the most flagrant violators have violations extending beyond five years. In addition, EPA would be prevented from pursuing the violators due to the destruction or nonexistence of essential records.

3(f) Confidentiality

Any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in Title 40, chapter 1, part 2, subpart B - Confidentiality of Business Information (see 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

3(g) Sensitive Questions

The reporting or recordkeeping requirements in the standard do not include sensitive questions.

4. The Respondents and the Information Requested

4(a) Respondents/SIC Codes

The respondents to the recordkeeping and reporting requirements are friction materials manufacturing facilities. The United States Standard Industrial Classification (SIC) codes for the respondents affected by the standards and their corresponding North American Industry Classification System (NAICS) codes are listed below.

| Standard (40 CFR Part 63, Subpart QQQQQ) | SIC Codes | NAICS Codes |
|---|------------------|--------------------|
| Motor Vehicle Brake System Manufacturing | 3714 | 336340 |
| All Other Miscellaneous Nonmetallic Mineral Product Manufacturing | 3299 | 327999 |
| Mechanical Power Transmission Equipment Manufacturing | 3568 | 333613 |

4(b) Information Requested

(i) Data Items

In this ICR, all the data that is recorded or reported is required by the NESHAP for

Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ).

A source must make the following reports:

| Notifications | |
|--|----------------------------------|
| Notification of construction/reconstruction | 63.5(d) |
| Request to use an alternative monitoring procedure | 63.9535(a), 63.8(f)(4) |
| Initial notifications | 63.9535(a), (c), (d), 63.9(b) |
| Request for extension of compliance | 63.9535(a), 63.9(c) |
| Notification that source is subject to special compliance requirements | 63.9535(a), 63.9(d) |
| Notification of compliance status | 63.9535(a), (e), 63.9(h) |
| Notification for use of a control technique other than a solvent recovery system and/or solvent substitution | 63.9535(b), 63.9570 |

| Reports | |
|---|-----------------------------|
| Semiannual compliance report on no deviations | 63.9540(b)(5-6) |
| Semiannual report on deviations | 63.9540(c), 63.10(e) (3) |
| Waiver of recordkeeping or reporting requirements | 63.10(f) |

A source must keep the following records:

| Recordkeeping | |
|---|---|
| Maintain records of all reports and notifications for 5 years | 63.9550, 63.10(b)(1) |
| Maintain records for initial notification and notification of compliance status | 63.9545(a)(1), 63.10(b)(xiv) |
| Maintain records showing proper operation and maintenance of the weight measurement device | 63.9525, 63.9545(c) |
| Maintain records showing continuous compliance with the emission limitations for solvent mixers | 63.9530, 63.9545(c), 63.10(b)(2)(vi), (x- xi) |

Electronic Reporting

Some of the respondents are using monitoring equipment that automatically records parameter data. Although personnel at the affected facility must still evaluate the data, internal automation has significantly reduced the burden associated with monitoring and recordkeeping at a plant site.

(ii) Respondent Activities

| Respondent Activities |
|---|
| Read and understand the rule requirements. |
| Install, calibrate, maintain, and operate weight measurement device for measuring HAP solvent loaded into the solvent mixer and solvent recovered from each mix batch. |
| Write the notifications and reports listed above. |
| Enter information required to be recorded above. |
| Submit the required reports developing, acquiring, installing, and utilizing technology and systems for the purpose of collecting, validating, and verifying information. |
| Develop, acquire, install, and utilize technology and systems for the purpose of processing and maintaining information. |
| Develop, acquire, install, and utilize technology and systems for the purpose of disclosing and providing information. |
| Adjust the existing ways to comply with any previously applicable instructions and requirements. |
| Train personnel to be able to respond to a collection of information. |
| Transmit, or otherwise disclose the information. |

5. The Information Collected: Agency Activities, Collection Methodology, and Information Management

5(a) Agency Activities

EPA conducts the following activities in connection with the acquisition, analysis, storage, and distribution of the required information.

| Agency Activities |
|--------------------------|
| |

| Agency Activities |
|---|
| Review notifications and reports, including performance test reports, and excess emissions reports, required to be submitted by industry. |
| Review reports, including performance test reports and semiannual compliance reports, required to be submitted by industry. |
| Input, analyze, and maintain data in the Enforcement and Compliance History Online (ECHO) and ICIS. |

5(b) Collection Methodology and Management

Following notification of startup, the reviewing authority could inspect the source to determine whether the pollution control devices are properly installed and operated. Performance test reports are used by the Agency to discern a source's initial capability to comply with the emission standard. Data and records maintained by the respondents are tabulated and published for use in compliance and enforcement programs. The semiannual reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations.

Information contained in the reports is entered into the EPA's ECHO, which is operated and maintained by the EPA's Office of Enforcement and Compliance Assurance. ECHO is the EPA's database to provide integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. The EPA uses ECHO for tracking air pollution compliance and enforcement by local and state regulatory agencies, EPA regional offices and EPA headquarters. The EPA and its delegated Authorities can edit, store, retrieve and analyze the data. ECHO allows users (including the public) to search and obtain information on permits data, inspections, violations, enforcement actions, and penalties.

The records required by this regulation must be retained by the owner/operator for 5 years.

5(c) Small Entity Flexibility

All current respondents are large entities (i.e., large businesses).

5(d) Collection Schedule

The specific frequency for each information collection activity within this request is shown in below Table 1: Annual Respondent Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Amendments).

6. Estimating the Burden and Cost of the Collection

Table 1 documents the computation of individual burdens for the recordkeeping and reporting requirements applicable to the industry for the subpart included in this ICR. The individual burdens are expressed under standardized headings believed to be consistent with the concept of burden under the Paperwork Reduction Act. Where appropriate, specific tasks and major assumptions have been identified. Responses to this information collection are mandatory.

The Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

6(a) Estimating Respondent Burden

The average annual burden to industry over the next three years from these recordkeeping and reporting requirements is estimated to be 535 (Total Labor Hours from Table 1). These hours are based on Agency studies and background documents from the development of the regulation, Agency knowledge and experience with the NESHAP program, the previously approved ICR, and any comments received.

6(b) Estimating Respondent Costs

(i) Estimating Labor Costs

This ICR uses the following labor rates:

| Civilian Labor Category | Occupational Code | BLS Mean Wage Estimate, in 2016\$^a | Loaded Wage (+110%), in 2016\$ |
|--------------------------------|--------------------------|--|---------------------------------------|
| Managerial | 11-1021 | \$58.70 | \$123.27 |
| Technical | 51-8090 | \$30.65 | \$64.37 |
| Clerical | 43-6010 | \$19.39 | \$40.72 |

^a https://www.bls.gov/oes/current/oes_nat.htm#00-0000

These rates are from the United States Department of Labor, Bureau of Labor Statistics, survey titled *May 2016 National Occupational Employment and Wage Estimates United States.* The rates are from column 8, "Mean hourly wage." The rates have been increased by 110 percent to account for the benefit packages available to those employed by private industry.

(ii) Estimating Capital/Startup and Operation and Maintenance Costs

The type of industry costs associated with the information collection activities in the subject standard are both labor costs which are addressed elsewhere in this ICR and the costs associated with continuous monitoring. The capital/startup costs are one-time costs when a facility becomes subject to the regulation. The annual operation and maintenance costs are the ongoing costs to maintain the monitor and other costs such as photocopying and postage.

(iii) Capital/Startup vs. Operation and Maintenance (O&M) Costs

| Capital/Startup vs. Operation and Maintenance (O&M) Costs | | | | | | |
|--|--|--|--|--|---|------------------------------|
| (A) Continuous Monitoring Device | (B) Capital/Startup Cost for One Respondent | (C) Number of New Respondents | (D) Total Capital/Startup Cost, (B X C) | (E) Annual O&M Costs for One Respondent | (F) Number of Respondents with O&M | (G) Total O&M, (E X F) |
| Monitoring Control Device | \$2,139 | 0 | \$0 | \$272 | 2 | \$544 |
| | | | | | Total | \$544 |

Note: Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

The total capital/startup costs for this ICR are \$0. This is the total of column D in the above table.

The total operation and maintenance (O&M) costs for this ICR are \$544. This is the total of column G.

The average annual cost for capital/startup and operation and maintenance costs to industry over the next three years of the ICR is estimated to be \$544. These are recordkeeping costs.

6(c) Estimating Agency Burden and Cost

The only costs to the Agency are those costs associated with analysis of the reported information. EPA's overall compliance and enforcement program includes activities such as the examination of records maintained by the respondents, periodic inspection of sources of emissions, and the publication and distribution of collected information.

The average annual Agency cost during the three years of the ICR is estimated to be \$1,960.

| Agency Worker Rates | Labor Rates, \$/hr^a | 60% Overhead | Total, \$/hr |
|----------------------------|---------------------------------------|---------------------|---------------------|
| Managerial (GS-13, step 5) | \$40.50 | \$24.30 | \$64.80 |
| Technical (GS-12, step 1) | \$30.05 | \$18.03 | \$48.08 |
| Clerical (GS-6, step 3) | \$16.26 | \$9.76 | \$26.02 |

^a https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2016/GS_h.pdf

These rates are from the Office of Personnel Management (OPM), 2017 General Schedule, which excludes locality rates of pay. The rates have been increased by 60 percent to account for the benefit packages available to government employees. Details upon which this estimate is based appear below in Table 2: Average Annual EPA Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Renewal).

6(d) Estimating the Respondent Universe and Total Burden and Costs

Based on our research for this ICR, there are 2 existing respondents currently subject to the standard, all of which will keep records and submit reports. It is estimated that no additional respondents per year will become subject. The overall average number of respondents, as shown in the table below, is 2 per year.

The number of respondents is calculated using the following table that addresses the three years covered by this ICR.

| Number of Respondents | | | | | |
|-----------------------|---|---------------------------------------|---|---|--|
| | Respondents That Submit Reports | | Respondents That Do Not Submit Any Reports | | |
| Year | (A) Number of New Respondents ¹ | (B) Number of Existing Respondents | (C) Number of Existing Respondents that keep records but do not submit reports | (D) Number of Existing Respondents That Are Also New Respondents | (E) Number of Respondents (E=A+B+C-D) |
| 1 | 0 | 2 | 0 | 0 | 2 |
| 2 | 0 | 2 | 0 | 0 | 2 |
| 3 | 0 | 2 | 0 | 0 | 2 |
| Average | 0 | 2 | 0 | 0 | 2 |

¹ New respondents include sources with constructed, reconstructed and modified affected facilities.

Column D is subtracted to avoid double-counting respondents. As shown above, the average Number of Respondents over the three-year period of this ICR is 2.

The total number of annual responses per year is calculated using the following table:

| Total Annual Responses | | | | |
|---|------------------------------|----------------------------|---|---|
| (A) Information Collection Activity | (B) Number of Respondents | (C) Number of Responses | (D) Number of Existing Respondents That Keep Records But Do Not Submit Reports | (E) Total Annual Responses E=(BxC)+D |
| Notification of applicability | 0 | 1 | N/A | 0 |
| Notification of construction/reconstruction | 0 | 1 | N/A | 0 |
| Notification of anticipated startup | 0 | 1 | N/A | 0 |
| Notification of actual startup | 0 | 1 | N/A | 0 |

| Total Annual Responses | | | | |
|---------------------------------------|-----|---|--------------|----------|
| Notification of compliance status | 0 | 1 | N/A | 0 |
| Semiannual report of deviation | 0.3 | 2 | N/A | 0.6 |
| Semiannual report with no deviation | 1.7 | 2 | N/A | 3.4 |
| Startup, shutdown, malfunction report | 0.2 | 2 | N/A | 0.4 |
| | | | Total | 4 |

The number of Total Annual Responses is 4 (rounded).

The total annual labor costs are \$34,700. Details regarding these estimates may be found below in Table 1: Annual Respondent Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Renewal).

6(e) Bottom Line Burden Hours and Cost Tables

The detailed bottom line burden hours and cost calculations for the respondents and the Agency are shown in Tables 1 and 2 below, respectively, and summarized below.

(i) Respondent Tally

The total annual labor hours are 535. Details regarding these estimates may be found in Table 1. Annual Respondent Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQQ) (Renewal).

We assume that burdens for managerial tasks take 5% of the time required for technical tasks because the typical tasks for managers are to review and approve reports. Clerical burdens are assumed to take 10% of the time required for technical tasks because the typical duties of clerical staff are to proofread the reports, make copies and maintain records.

Furthermore, the annual public reporting and recordkeeping burden for this collection of information is estimated to average 134 hours per response.

The total annual capital/startup and O&M costs to the regulated entity are \$544. The cost calculations are detailed in Section 6(b)(iii), Capital/Startup vs. Operation and Maintenance (O&M) Costs.

(ii) The Agency Tally

The average annual Agency burden and cost over next three years is estimated to be 38 labor hours at a cost of \$1,960. See Table 2: Average Annual EPA Burden and Cost – NESHAP

for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQ) (Renewal).

We assume that burdens for managerial tasks take 5% of the time required for technical tasks because the typical tasks for managers are to review and approve reports. Clerical burdens are assumed to take 10% of the time required for technical tasks because the typical duties of clerical staff are to proofread the reports, make copies and maintain records.

6(f) Reasons for Change in Burden

This ICR is prepared for amendments to the NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQ). These amendments adjust references to the Part 63 General Provisions (40 CFR, Part 63, Subpart A) and revise provisions in the NESHAP (40 CFR Part 63, Subpart QQQQ) to remove the SSM exemption, SSM plan, and periodic reporting requirements, as well as increasing the associated hours for the semiannual report of deviations. Where applicable, adjustments for these amendments are reflected in Tables 1 and 2 of this ICR.

The number of facilities subject to the standards changed based on consultation with industry representatives and state/local agencies. Consolidation within the industry and instances where facilities reduced their HAP emissions to below major source thresholds prior to the compliance date reduced the number of affected facilities to two that are currently subject to the standards.

Costs per labor hour decreased due to using mean hourly rates instead of total compensation rates that were previously used. The mean hourly rates are discussed in more detail in section 6(b)(i) above. Burden estimates were removed for developing SSM plans, recording SSM events, and submitting periodic SSM reports, and increased for additional reporting requirements in the semiannual report of deviation.

6(g) Burden Statement

The annual public reporting and recordkeeping burden for this collection of information is estimated to average 134 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB Control Number. The OMB Control Numbers for EPA regulations are listed at 40 CFR Part 9 and 48 CFR Chapter 15.

To comment on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including the use of automated collection techniques, EPA has established a public docket for this ICR under Docket ID Number EPA-HQ-OECA-2014-0085. An electronic version of the public docket is available at <http://www.regulations.gov/> which may be used to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. When in the system, select “search,” then key in the docket ID number identified in this document. The documents are also available for public viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the docket center is (202) 566-1927. Also, you can send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW, Washington, DC 20503, Attention: Desk Officer for EPA. Please include the EPA Docket ID Number EPA-HQ-OECA-2014-0085 and OMB Control Number 2060-0481 in any correspondence.

Part B of the Supporting Statement

This part is not applicable because no statistical methods were used in collecting this information.

Table 1: Annual Respondent Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQ) (Amendments)

| Burden item | (A) | (B) | (C) | (D) | (E) | (F) | (G) | (H) |
|--|--|--|--|-----------------------------------|---|---|--|------------------------------------|
| | Person hours per occurrence ^e | No. of occurrences per respondent per year | Person hours per respondent per year (C=AxB) | Respondents per year ^a | Technical person-hours per year (E=CxD) | Management person hours per year (F=Ex0.05) | Clerical person hours per year (G=Ex0.1) | Total Annual Cost, \$ ^b |
| 1. Applications | N/A | | | | | | | |
| 2. Survey and Studies | N/A | | | | | | | |
| 3. Acquisition, installation and utilization of technology and systems | 54 | 1 | 54 | 0 | 0 | 0 | 0 | \$0 |
| 4. Reporting requirements | | | | | | | | |
| A. Familiarize with regulatory requirements ^c | 0.5 | 1 | 0.5 | 2 | 1 | 0.05 | 0.1 | \$74.61 |
| B. Required activities | | | | | | | | |
| C. Create information | See 4B | | | | | | | |
| D. Gather existing information | See 4E | | | | | | | |
| E. Write Report | | | | | | | | |
| Notification of applicability | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of construction/reconstruction | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of anticipated startup | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of actual startup | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of compliance status | 4 | 1 | 4 | 0 | 0 | 0 | 0 | \$0 |
| Semiannual report of deviation ^d | 9 | 2 | 18 | 0.3 | 5.4 | 0.27 | 0.54 | \$402.87 |
| Semiannual report of no deviation ^e | 8 | 2 | 16 | 1.7 | 27.2 | 1.36 | 2.72 | \$2,029.27 |
| Subtotal for Reporting Requirements | | | | | | 39 | | \$2,507 |

| TOTAL LABOR BURDEN AND COST (rounded) ^j | | | | | | 535 | | \$34,700 |
| TOTAL CAPITAL AND O&M COST (rounded) ^j | | | | | | | | \$544 |
| GRAND TOTAL (rounded) ^k | | | | | | | | \$35,200 |

Assumptions:

^a We have assumed that there are 2 existing sources, and that no additional new or reconstructed sources will become subject to the rule over the next three years.

^b This ICR uses the following labor rates: \$123.27 per hour for Executive, Administrative, and Managerial labor; \$64.37 per hour for Technical labor, and \$40.72 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, May 2016 National Occupational Employment and Wage Estimates United States. The rates are from the column Mean Hourly Wage. The rates have been increased by 110 percent to account for the benefit packages available to those employed by private industry.

^c We have assumed that all respondents will have to familiarize with the regulatory requirements each year.

^d We have assumed that 15 percent of respondents will report deviation.

^e We have assumed that 85 percent of respondents will report no deviation.

^f We have assumed that solvent weights are recorded once per hour (2 minutes [0.033 hr] per record) for 2,600 hours per year (industry average annual operating hours for solvent mixers).

^g It is assumed that information would be entered once per week for 52 weeks per year.

^h We have assumed that a typical plant transmits the deviation report; and no deviation report semiannually; resulting in 4 each year.

ⁱ We have assumed that it will take 20 hours per plant once a year to train personnel.

^j Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

Table 2: Average Annual EPA Burden and Cost – NESHAP for Friction Materials Manufacturing (40 CFR Part 63, Subpart QQQQ) (Amendments)

| Activity | (A) | (B) | (C) | (D) | (E) | (F) | (G) | (H) |
|--|---------------------------------|---------------------------------------|---|------------------------------|---|---|--|-----------------------|
| | EPA person-hours per occurrence | No. of occurrences per plant per year | EPA person-hours per plant per year (C=AxB) | Plants per year ^a | Technical person-hours per year (E=CxD) | Management person-hours per year (F=Ex0.05) | Clerical person-hours per year (G=Ex0.1) | Cost, \$ ^b |
| 1. Excess emissions enforcement activities ^c | 48 | 1 | 48 | 0.1 | 4.8 | 2.4 | 0.48 | \$398.79 |
| 2. Report review | | | | | | | | |
| Notification of applicability | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of construction/ reconstruction | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of anticipated startup | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of actual startup | 2 | 1 | 2 | 0 | 0 | 0 | 0 | \$0 |
| Notification of compliance status | 40 | 1 | 40 | 0 | 0 | 0 | 0 | \$0 |
| Semiannual report of deviation ^d | 20 | 2 | 40 | 0.3 | 12 | 6 | 1.2 | \$996.98 |
| Semiannual report of no deviation ^e | 2 | 2 | 4 | 1.7 | 6.8 | 3.4 | 0.68 | \$564.96 |
| TOTAL ANNUAL BURDEN AND COST (rounded) ^f | | | | | | 38 | | \$1,960 |

Assumptions:

^a We have assumed that there are 2 existing sources, and that no additional new or reconstructed sources will become subject to the rule over the next three years.

^b This cost is based on the following labor rates which have been increased by 60 percent to account for the benefit package available to government employees: \$64.80 Managerial rate (GS-13, Step 5, \$40.50 + 60%), \$48.08 Technical rate (GS-12, Step 1, \$30.05+ 60%), and \$26.02 Clerical rate (GS-6, Step 3, \$16.26 + 60). These rates are from the Office of Personnel Management (OPM) 2017 General Schedule which excludes locality rates of pay.

^c We have assumed that 5 percent of plants will be involved in excess emissions enforcement activities.

^d We have assumed that 15 percent of respondents will report deviation.

^e We have assumed that 85 percent of respondents will report no deviation.

^f Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
