

reporting these violations. The results of the survey will provide the Office of Law Enforcement a better understanding of how often observers are victimized, which will enable them to reallocate resources as needed, conduct more training for observers to ensure they know how to report, conduct training to ensure people understand what constitutes a victim crime, and to increase awareness of potential victimizations. Additionally, the survey results will help law enforcement understand the barriers to disclosure, so enforcement may begin to address these impediments so they no longer prevent observers from disclosure.

Data will be collected on a voluntary basis, via an electronic survey to ensure anonymity. The survey will be offered to all observers who deployed in 2016 and 2017 in the North Pacific Observer Program. Individual data will not be released for public use.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

The objective of the short survey will be to understand how anglers respond to changes in trip costs and fishing regulations in the Gulf of Mexico. We are conducting this survey to improve our ability to predict changes the number of fishing trips anticipated with changes in economic conditions or fishing regulations. This will improve the analysis of the economic effects of proposed changes in fishing regulations and changes in economic factors that affect the cost of fishing such as fuel prices.

The population consists of those anglers who fish in the Gulf of Mexico from Florida, including those who possess a license to fish, and those who are not required to have a license (e.g., seniors). We plan to independently sample from the frame designed for the Fishing Effort Survey (FES) of the Marine Recreational Fishing Program (MRIP). Anglers will be mailed a postcard that directs them to a Web site to complete the survey.

II. Method of Collection

The survey will be conducted using two modes: Mail and Internet.
