BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Disease Control and Prevention**

[60Day-17-17ZX; Docket No. CDC-2017-0032]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on “Childhood Blood Lead Surveillance (CBLS) and Adult Blood Lead Epidemiology and Surveillance (ABLES).” The National Center for Environmental Health (NCEH) is leading a new three-year information collection request (ICR) that covers two CDC information collections, one for childhood blood lead surveillance by NCEH and another for adult blood lead surveillance by the National Institute for Occupational Safety and Health (NIOSH). CDC requests an annual time burden of 1,120 burden hours for both collections.

DATES: Written comments must be received on or before June 5, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2017-0032 by any of the following methods:

- **Federal eRulemaking Portal:** *Regulations.gov*. Follow the instructions for submitting comments.

- **Mail:** Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *Regulations.gov*, including any personal information provided. For access to the docket to read background documents or comments received, go to *Regulations.gov*.

Please note: All public comment should be submitted through the Federal eRulemaking portal (*Regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information

collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Childhood Blood Lead Surveillance (CBLS) and Adult Blood Lead Epidemiology and Surveillance (ABLES)—New—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Center for Environmental Health (NCEH) is leading a new three-year information collection request (ICR) that covers two Centers for Disease Control and Prevention (CDC) information collections, one for childhood blood lead surveillance by NCEH and another for adult blood lead surveillance by the National Institute for Occupational Safety and Health (NIOSH).

The goal of the NCEH Childhood Blood Lead Surveillance (CBLS) Program is to support blood lead screening and to promote primary prevention of exposure to lead. Also, the CBLS Program supports secondary prevention of adverse health effects when lead exposures occur in children through improved program management and oversight in respondent jurisdictions. The goal of the NIOSH Adult Blood Lead Epidemiology and Surveillance (ABLES) Program is to build state capacity for adult blood lead surveillance programs to measure trends in adult blood lead levels and to prevent lead over-exposures. Thus, blood lead surveillance over the human lifespan is covered under this single information collection request (ICR), specifically for children, less than 16 years, through CBLS at NCEH, and for adults, 16 years and older, through ABLES at NIOSH.

NCEH is announcing a new three-year cooperative agreement, titled “Lead Poisoning Prevention—Childhood Lead Poisoning Prevention—financed partially by Prevention and Public Health Funds” (Funding Opportunity Announcement [FOA] No. CDC-RFA-EH17-1701-PPHF17). The first year of this new program will run concurrently with the final and fourth budget year for “PPHF 2014: Lead Poisoning Prevention—Childhood Lead Poisoning Prevention—financed solely by 2014

Prevention and Public Health Funds” (FOA No. CDC-RFA-EH14-1408PPHF14). The four-year FY14 cooperative agreement program has an existing Paperwork Reduction Act (PRA) clearance titled “Healthy Homes and Lead Poisoning Surveillance System (HHLPSS)” (OMB Control No. 0920-0931; expiration date 05/31/2018), which will be extended through the end of the FY14 program and then discontinued.

In addition to the overlap in program periods, there are sufficient program differences to justify a new ICR for the FY17 NCEH cooperative agreement. For FY17, NCEH is requesting approval for the following: (1) Clarifying partners’ procedures for data delivery into the Childhood Blood Lead Surveillance (CBLS) system; (2) revising the CBLS Variables form to remove healthy homes variables, which will not be collected, and adding three new CBLS indicator variables. Based on available FY17 funds, NCEH is also requesting the following: (3) Increasing the number of potential NCEH respondents from 40 to 50; and (4) increasing the NCEH annual time burden from 640 to 800 hours.

CDC is also taking this opportunity to provide the public with a detailed description of the NIOSH ABLES information collection. Previously, ABLES was mentioned but not described in the HHLPSS ICR (OMB Control No. 0920-0931; expiration date 05/31/2018). Thus, NIOSH is requesting approval for the following: (1) Providing a detailed description of the authority and scope of the ABLES information reporting procedures; (2) adding 40 NIOSH respondents to the burden table; and (3) adding 320 hours for the NIOSH annual time burden. Once approved in this new ICR, CDC will submit a change request to remove ABLES from the

existing HHLPSS ICR to avoid duplication in PRA clearance.

Over the past several decades there have been substantial efforts in environmental lead abatement, improved protection from occupational lead exposure, and a reduction in the prevalence of population BLLs over time. The U.S. population BLLs have substantially decreased over the last four decades. For example, the CDC has reported the 1976–1980 U.S. BLL mean in children, 6 months to 5 years, as 16.0 micrograms per deciliter (µg/dL); and among adults, 18 to 74 years, 14.1 µg/dL. More recently, the CDC reported the 2009–2010 U.S. BLL geometric means among children, 1 to 5 years, and among adults, 20 years and older, as 1.2 µg/dL for both age groups.

In 2012, the National Toxicology Program (NTP) concluded that there is sufficient evidence that BLLs at less than 10 µg/dL and at less than 5 µg/dL are associated with adverse health effects in both children, less than 18 years, and in adults, 18 years and older. Despite the reduction in the overall population BLL over four decades, lead exposures continue to occur at unacceptable levels for individuals in communities and workplaces across the nation. Surveillance will continue through CBLS and ABLES to identify cases of elevated BLLs when primary prevention is not achieved. As of 2015, NCEH and NIOSH define elevated BLLs as greater than or equal to 5 µg/dL for individuals of all ages.

Respondents are defined as state, local, and territorial health departments with lead poisoning prevention programs. The estimated annual time burden for NCEH CBLS is 800 hours. The estimated annual time burden for NIOSH ABLES is 320 hours. In total, CDC is requesting approval for a total annual time burden of 1,120 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
State, Local, and Territorial Health Departments.	Childhood Blood Lead Surveillance (CBLS) Variables.	50	4	4	800
	Adult Blood Lead Epidemiology and Surveillance (ABLES) Variables.	40	1	8	320
Total	1,120

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-17-1146; Docket No. CDC-2017-
0029]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and
Prevention (CDC), Department of Health
and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease
Control and Prevention (CDC), as part of
its continuing efforts to reduce public
burden and maximize the utility of
government information, invites the
general public and other Federal
agencies to take this opportunity to
comment on proposed and/or
continuing information collections, as
required by the Paperwork Reduction
Act of 1995. This notice invites
comment on a revision to the
information collection project approved
under OMB Control number 0920-1146
(expiration date 11/30/2019), Survey of
Surveillance Records of *Aedes aegypti*
and *Aedes albopictus* from 1960 to
Present.

DATES: Written comments must be
received on or before June 5, 2017.

ADDRESSES: You may submit comments,
identified by Docket No. CDC-2017-
0029 by any of the following methods:

- **Federal eRulemaking Portal:**
Regulations.gov. Follow the instructions
for submitting comments.

- **Mail:** Leroy A. Richardson,
Information Collection Review Office,
Centers for Disease Control and
Prevention, 1600 Clifton Road NE., MS-
D74, Atlanta, Georgia 30329.

Instructions: All submissions received
must include the agency name and
Docket Number. All relevant comments
received will be posted without change
to *Regulations.gov*, including any
personal information provided. For
access to the docket to read background
documents or comments received, go to
Regulations.gov.

Please note: All public comment
should be submitted through the

Federal eRulemaking portal
(*Regulations.gov*) or by U.S. mail to the
address listed above.

FOR FURTHER INFORMATION CONTACT: To
request more information on the
proposed project or to obtain a copy of
the information collection plan and
instruments, contact the Information
Collection Review Office, Centers for
Disease Control and Prevention, 1600
Clifton Road NE., MS-D74, Atlanta,
Georgia 30329; phone: 404-639-7570;
Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the
Paperwork Reduction Act of 1995 (PRA)
(44 U.S.C. 3501-3520), Federal agencies
must obtain approval from the Office of
Management and Budget (OMB) for each
collection of information they conduct
or sponsor. In addition, the PRA also
requires Federal agencies to provide a
60-day notice in the **Federal Register**
concerning each proposed collection of
information, including each new
proposed collection, each proposed
extension of existing collection of
information, and each reinstatement of
previously approved information
collection before submitting the
collection to OMB for approval. To
comply with this requirement, we are
publishing this notice of a proposed
data collection as described below.

Comments are invited on: (a) Whether
the proposed collection of information
is necessary for the proper performance
of the functions of the agency, including
whether the information shall have
practical utility; (b) the accuracy of the
agency's estimate of the burden of the
proposed collection of information; (c)
ways to enhance the quality, utility, and
clarity of the information to be
collected; (d) ways to minimize the
burden of the collection of information
on respondents, including through the
use of automated collection techniques
or other forms of information
technology; and (e) estimates of capital
or start-up costs and costs of operation,
maintenance, and purchase of services
to provide information.

Burden means the total time, effort, or
financial resources expended by persons
to generate, maintain, retain, disclose or
provide information to or for a Federal
agency. This includes the time needed
to review instructions; to develop,
acquire, install and utilize technology
and systems for the purpose of
collecting, validating and verifying
information, processing and
maintaining information, and disclosing
and providing information; to train
personnel and to be able to respond to
a collection of information, to search
data sources, to complete and review
the collection of information; and to

transmit or otherwise disclose the
information.

Proposed Project

Survey of Surveillance Records of
Aedes aegypti and *Aedes albopictus*
from 1960 to Present—Revision—(OMB
Control number 0920-1146, expires 11/
30/2019) National Center for Emerging
and Zoonotic Infectious Diseases
(NCEZID), Centers for Disease Control
and Prevention (CDC).

Background and Brief Description

The Zika virus response necessitates
the collection of county and sub-county
level records for *Aedes aegypti* and *Ae.*
albopictus, the vectors of Zika virus.
This information will be used to update
species distribution maps for the United
States and to develop a model aimed at
identifying where these vectors can
survive and reproduce. CDC is seeking
to revise the information collection
approved under OMB Control number
0920-1146 to collect information for
three years.

In February 2016, OMB received
emergency clearance for a county-level
survey of vector surveillance records for
a limited number of years (2006-2015)
(OMB Control No. 0920-1101,
expiration date 8/31/2016). OMB then
issued clearance for a follow-up
information collection that was very
similar to the first (OMB Control No.
0920-1146, expiration date 11/30/2019)
but expanded the years that were
evaluated. The information collection in
this information collection request will
be very similar of those surveys, but will
collect these data monthly going
forward.

The previous two surveys aimed to
describe the reported distribution of the
Zika virus vectors *Aedes aegypti* and
Ae. albopictus from 1960 until late 2016
at county and sub-county spatial scales.
The 56-year data review was necessary
because many recent records for these
species of mosquitos were lacking,
likely because from 2004-2015 most
vector surveillance focused on vectors
of West Nile virus (*Culex* spp.) rather
than Zika vectors. The surveys yielded
important data allowing CDC, states,
and partners to understand the spread of
these mosquitos in the U.S as well as
the environmental conditions necessary
for them to survive. The surveys
reviewed data records from 1960-2016
and resulted in a complete assessment
of historical records of mosquito
surveillance but were not designed to
collect these types of data routinely over
time.

In this revision, CDC will also seek
information on locations of the
mosquito traps at sub-county spatial
