

#### BABI2 12m Questionnaire

Page 2 of 23

#### Welcome to the Balance After Baby 12 Month Survey!

THANK YOU for taking part in this important project to help us test whether a lifestyle program, designed specifically for women like you with a recent history of gestational diabetes mellitus (GDM), will help women lose weight gained during pregnancy and reduce risk factors for developing type 2 diabetes. We will be asking you to complete two questionnaires. The first questionnaire will take about 16 minutes. It will tell us about your medical history, physical activity levels, mood, and perceived stress. The second questionnaire will take about 18 minutes. It will tell us about the foods you usually eat. You can skip any questions you choose not to answer. Your answers will not be shared with anyone outside of the study staff.

Public reporting of this collection of information is estimated to average 16 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE MS D-74. Atlanta. Georgia 30333: ATTN: PRA (0920-1115). Exp. Date 6(30)/2019
