\*Sample size and respondents for the "interview scheduling and interviews" activity: The sample for this activity are all part of the group of 280 respondents who complete the "interview phone screening" activity above. Since these individuals are involved in two activities ("interview phone screening" and "interview scheduling and interviews"), they are only included in the sample calculation once, for the "interview phone screening" activity, since otherwise they would be double counted. Similarly, the 200 respondents who participate in the "interview scheduling and interview" activity were included in the 280 who complete the "interview phone screening" activity. As such, they are only included in the estimated number of respondents column for the "interview phone screening" activity since otherwise they would be double counted.

\*\* Sample size and respondents for the State SNAP Directors: State SNAP Directors are only counted in the sample size and respondent calculations once since the same individuals participate in both the "complete MOU" and "Data collection site visits" tasks.

Note for Cell J6: Dual respondents for interview phone screenings and interviews: Of 560 participants in the interview phone screening component, 280 will respond. Of these 280, we estimate that 80 will not respond for the final interview component. Therefore, the 80 participants in this cell are respondents for the screenings and nonrespondents for the interviews.
