SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Endangered Species
Act (16 U.S.C. 1531 *et seq.*; ESA) and
our implementing regulations in the
Code of Federal Regulations (CFR) at 50
CFR part 17 prohibit the “take” of fish
or wildlife species listed as endangered
or threatened. Take of listed fish or
wildlife is defined under the ESA as “to
harass, harm, pursue, hunt, shoot,
wound, kill, trap, capture, or collect, or
to attempt to engage in any such
conduct” (16 U.S.C. 1532(19)).
However, under limited circumstances,
we issue permits to authorize incidental
take—*i.e.*, take that is incidental to, and
not the purpose of, the carrying out of
an otherwise lawful activity.

Regulations governing incidental take
permits for endangered and threatened
species are at 50 CFR 17.22 and 17.32,
respectively. The ESA’s take
prohibitions do not apply to federally
listed plants on private lands unless
such take would violate State law. In
addition to meeting other criteria, the
take authorized by an incidental take
permit must not jeopardize the
existence of federally listed fish,
wildlife, or plants.

Applicant’s Proposal

DR Horton, Inc., is requesting an
incidental take permit (ITP) to take sand
skink (*Neoseps reynoldsi*) through the
permanent destruction of approximately
2.8 acres (ac) of occupied foraging and
sheltering habitat incidental to the
widening of Avalon Road (CR 545) in
Orange County, Florida. The 60.4-ac
habitat conservation plan (HCP) project
site is located on Avalon Road, starting
at the intersection of Schofield Road
and Avalon Road and ending
approximately 4.0 miles north of U.S.
192, within sections 5, 8, 17, and 32,
Townships 23 and 24 South, Range 27
East in Orange County. The project
activities include the clearing,
infrastructure building, and landscaping
associated with road widening. The
sand skink will likely be subjected to
take in the form of injury, mortality,
and/or loss of habitat. Applicant
proposes to mitigate for the take of the
species by purchasing 5.6 mitigation
credits within the Lake Wales Ridge

Conservation Bank or another Service-
approved sand skink conservation bank.

Our Preliminary Determination

We have determined that the
applicant’s proposed plan, including the
proposed mitigation and minimization
measures, would have minor or
negligible effects on the covered species
and the environment so as to be “low
effect” and qualify for categorical
exclusion under the National
Environmental Policy Act (NEPA), as
provided by 43 CFR 46.205 and 46.210.
A low-effect HCP is one involving (1)
minor or negligible effects on federally
listed or candidate species and their
habitats, and (2) minor or negligible
effects on other environmental values or
resources.

Next Steps

We will evaluate the HCP and
comments we receive to determine
whether the ITP application meets the
requirements of section 10(a) of the
ESA. We will also conduct an intra-
Service consultation to evaluate take of
the sand skink in accordance with
section 7 of the ESA. We will use the
results of the consultation, in
combination with the above findings, in
our analysis of whether or not to issue
the ITP. If the requirements are met, we
will issue ITP number TE59070C-0 to
the applicant.

Public Comments

If you wish to comment on the permit
application, HCP, or associated
documents, you may submit comments
by any one of the methods listed in
ADDRESSES.

Public Availability of Comments

Before including your address, phone
number, email address, or other
personal identifying information in your
comment, you should be aware that
your entire comment—including your
personal identifying information—may
be made publicly available at any time.
While you can ask us in your comment
to withhold your personal identifying
information from public review, we
cannot guarantee that we will be able to
do so.

Authority: We provide this notice under
section 10 of the ESA and NEPA regulation
40 CFR 1506.6.
