OMB Control Number: 0694-0120 Expiration Date: December 31, 2020

Section 232 Investigation of Imports of Mobile Cranes on the National Security

SCOPE OF ASSESSMENT

The U.S. Department of Commerce, Bureau of Industry and Security (BIS), Office of Technology Evaluation (OTE), is conducting a survey of U.S. mobile crane production. The survey results will be used to support an ongoing investigation of the effect of imports of mobile cranes and their associated subassemblies on U.S. national security initiated under Section 232 of the Trade Expansion Act of 1962, as amended.

The principal goal of this survey is to assist the U.S. Department of Commerce in determining whether mobile cranes are being imported into the United States in such quantities or under such circumstances as to threaten to impair the national security. Information collected will include facilities and production data, imports and exports, supply chain networks, customers, sales and demand data, employment information, conditions of domestic and global competition, research and development, and other factors. The resulting data will provide the U.S. Department of Commerce detailed information on the U.S. mobile crane industry that is otherwise not publicly available and needed to effectively conduct this Section 232 investigation.

RESPONSE TO THIS SURVEY IS REQUIRED BY LAW

A response to this survey is required by law (50 U.S.C. Sec. 4555). Failure to respond can result in a maximum fine of \$10,000, imprisonment of up to one year, or both. Information furnished herewith is deemed confidential and will not be published or disclosed except in accordance with Section 705 of the Defense Production Act of 1950, as amended (50 U.S.C. Sec. 4555). Section 705 prohibits the publication or disclosure of this information unless the President determines that its withholding is contrary to the national defense. Information will not be shared with any non-government entity, other than in aggregate form. The information will be protected pursuant to the appropriate exemptions from disclosure under the Freedom of Information Act (FOIA), should it be the subject of a FOIA request.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

BURDEN ESTIMATE AND REQUEST FOR COMMENT

Public reporting burden for this collection of information is estimated to average 10 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information to BIS Information Collection Officer, Room 6883, Bureau of Industry and Security, U.S. Department of Commerce, Washington, D.C. 20230, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0694-0120), Washington, D.C. 20503.

BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

	III. General Instructions
	Your organization is required to complete this survey of U.S. mobile crane production, which can be downloaded from the BIS website as an Excel document: TBD
A.	If you are unable to download the survey document, at your request, BIS survey support staff will e-mail the Excel survey template directly to you.
	For your convenience, a PDF version of the survey and required drop-down content is available on the BIS website to aid internal data collection. DO NOT SUBMIT the PDF version of the survey as your response to BIS. Should this occur, your organization will be required to resubmit the survey in the requested Excel format.
В.	Respond to every question. Surveys that are not fully completed will be returned for completion. Use the comment boxes to provide any information to supplement responses provided in the survey form. Make sure to record a complete answer in the space provided, even if the space does not appear to expand to fit all of the information. This is a comprehensive survey of mobile crane and mobile crane subassemblies production. As such, some questions may not be relevant to your organization. Read each question carefully to ensure its applicability to your organization.
	DO NOT CUT AND PASTE RESPONSES WITHIN THIS SURVEY OR PASTE IN RESPONSES FROM OUTSIDE THE SURVEY. Survey inputs should be completed by typing in responses or by using a drop-down menu. The use of cut and paste can corrupt the survey template. If your survey response is corrupted as a result of cut and paste response, your survey will be rejected and your organization must immediately resubmit the survey.
C.	Do not disclose any USG classified information in this survey form.
D.	Upon completion of the survey, final review, and certification, transmit the survey document via e-mail to : Mobilecranes232@bis.doc.gov
	Questions related to the survey should be directed to BIS survey support staff at Mobilecranes232@bis.doc.gov_
E.	E-mail is the preferred method of contact.
	You may speak with a member of the BIS survey support staff by calling (202) 482-0194.
	For questions related to the overall scope of this Section 232 Investigation, contact Mobilecranes232@bis.doc.gov or:
F.	Jason D. Bolton Program Manager, Industrial Studies BIS/Export Administration/Office of Technology Evaluation 1401 Constitution Avenue, NW, Room 1093 Washington, DC 20230
	DO NOT submit completed surveys to Mr. Bolton's postal or personal e-mail address. All surveys must be submitted electronically to: Mobilecranes232@bis.doc.gov
	BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

Previous Page	IV. Definitions
Term	Definition
All-Terrain Cranes	A hybrid mobile crane, which combines the road ability of a truck-mounted crane with the on-site maneuverability of a rough terrain crane. These cranes can drive on public roads and may be used to access all types of job sites with their all-wheel steering. All terrain cranes are generally outfitted with outriggers for stability.
Applied Research	A systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met. This activity includes work leading to the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes.
Authorizing Official	An executive officer of the organization or business unit or another individual who has the authority to execute this survey on behalf of the organization.
Basic Research	A systematic, scientific study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts.
Boom Truck Cranes	These mobile cranes are cranes mounted on a commercial truck chassis. Boom truck cranes are typically produced in two different configurations, stand-up or sit-down. Stand-up boom trucks allow the operator to operate the crane from an outside control station or via remote control. Sit-down boom truck cranes have a cab for the operator to sit in and operate the crane.
Capacity Utilization Rate	An operational metric for facilities expressed as a percentage that shows their aggregate productive capacity.
Capital Expenditures	Investments made by an organization in buildings, equipment, property, and systems where the expense is depreciated. This does not include expenditures for consumable materials, other operating expenses, and salaries associated with normal business operations.
Critical Infrastructure	Sectors whose assets, systems, and networks, whether physical or virtual, are considered so vital to the United States that their incapacitation or destruction would have a debilitating effect on security, national economic security, national public health and safety, or any combination thereof.
Customer	Any organization (external or internal entity) for which your organization manufactures/processes any product comprised of, or containing, steel in any form.
Development (product/process)	A system of defined steps and tasks such as strategy, organization, concept generation, marketing plan creation, evaluation, and commercialization of a new product. It is a cycle by means of which an innovative firm routinely converts ideas into commercially viable goods or services.
Defense Priorities and Allocations System (DPAS)	The purpose of DPAS is to assure the timely availability of industrial resources to meet current national defense and emergency preparedness program requirements and to provide an operating system to support rapid industrial response in a national emergency. The Defense Production Act of 1950 authorized the President to require preferential treatment of national defense programs.
Exports	Shipments to destinations outside the United States.
Facility	A building or the minimum complex of buildings or parts of buildings that conduct steel production, in which an organization operates to serve a particular function, producing revenue, and incurring costs for the company. A facility may produce an item of tangible or intangible property or may perform a service. It may encompass a floor or group of floors within a building, a single building, or a group of buildings or structures. Often, a facility is a group of related locations at which organization employees work, together constituting a profit-and-loss center for the company, and it may be identified by a unique Data Universal Numbering System (DUNS) number.
	Employees who work for 40 hours in a normal work wook. Convert part time employees into "full time

	Employees who work for 40 hours in a normal work week. Convert part-time employees into "full time equivalents" by taking their work hours as a fraction of 40 hours.
, , , ,	Contractors who work for 40 hours in a normal work week. Convert part-time contractors into "full time equivalents" by taking their work hours as a fraction of 40 hours.

Global Headquarters	A location that serves as the organization's hub of worldwide operations with all global branches or divisions reporting to it.
Harmonized Tariff Schedule (HTS)	A 10-digit numbering system that classifies a good based on its name, use, and/or the material used in its construction. The number provides Customs and Border Protection (CBP) with a standardized method of tracking all merchandise imported into the United States and sets out the tariff rates and statistical categories.
Import Value	Values reported should be landed, duty-paid values at the U.S. port of entry, including ocean freight and insurance costs, brokerage charges, and import duties (i.e., all charges except inland freight in the United States).
Industrial "Carry Deck" Cranes	These mobile cranes normally feature a telescoping boom and generally have a flat deck to allow the crane to pick and carry smaller loads.
Inventory	The goods or materials an organization holds for its own use or for the ultimate goal of sale.
Lattice Boom Crawler Cranes	These mobile cranes have their boom mounted on an undercarriage fitted with a set of crawler tracks to provide stability and mobility.
Mobile Cranes	A crane is a large machine used for moving heavy objects by suspending them from a projecting arm or beam. Cranes are generally equipped with a hoist rope, wire rope, or chains that can lift and lower materials and move them horizontally. Cranes subject of this survey can be mounted on wheels or treads and are therefore, mobile. There are three HTS codes regarding mobile cranes that are featured in this survey: 8426.41.00 (mobile cranes on tires) and 8426.49.00 (mobile cranes not on tires), and 8705.10.00 (mobile cranes).
Mobile Crane Subassemblies	Mobile crane subassemblies are the parts and components that comprise the lower works, upper works, superstructures, carrier, etc. of mobile cranes. These subassemblies are imported/exported to the U.S. under HTS code 8431.49.10.
Non-U.S. Facility	A facility that is physically located outside of the United States.
OEM	Originial Equipment Manufacturer.
Organization	A company, firm, laboratory, or other entity that owns or controls one or more U.S. establishment or facility capable of designing and/or manufacturing steel products.
Product Development	Conceptualization and development of steel product or steel production techniques prior to the production of the product for customers (i.e., utilities, governmental agencies, etc.).
Production	The process of transforming inputs (raw materials, semi-finished goods, subassemblies, ideas, information, knowledge) into goods or services.
Research & Development (R&D)	Basic and applied research in the engineering sciences, as well as design and development of prototype products and processes. Efforts that an organization conducts towards innovating, introducing and/or improving products and processes.
Rough Terrain Cranes	These mobile cranes have a boom mounted on an undercarriage that sits on four rubber tires and is designed for off-road use or pick and carry operations. Typically, rough terrain cranes are produced with outriggers that are used to level and stabilize the crane for hoisting heavy objects.
Sales	All reported and unreported sales of subject products, including sales to end-users, producers, financial entities, intermediaries, traders, distributors, et al.
Supplier	An entity from which your organization obtains inputs, which may be goods or services. A supplier may be another organization with which you have a contractual relationship, or it may be another facility owned by the same parent organization.
Telescopic Crawler Cranes	Versatile cranes which can lift and telescope high loads, and do not need to be supported on outriggers. They are known to be more flexible than lattice boom crawler cranes and the boom length can be adjusted very quickly.
Truck-mounted Crane	These mobile cranes typically consist of two parts: the carrier, often called the lower works, and the lifting component that includes the boom, called the upper works. Both sections are coupled together through a turntable, which allows the upper works to swing from side to side. Truck-mounted mobile cranes can drive on public roads.
United States (U.S.)	The "United States" or "U.S." includes the 50 states, the District of Columbia, Puerto Rico, Guam, America Samoa, the U.S. Virgin Islands, and the Northern Mariana Islands.
U.S. Government (USG)	Used to designate programs conducted or executed by a United States Government agency.
