FDA Food Safety Modernization Act National Agriculture and Food Defense Strategy State Survey on Food Defense Activities

[Sign out](#)

IMPORTANT INSTRUCTIONS - PLEASE TAKE YOUR TIME AND READ CAREFULLY

The items on this survey are about activities related to food- and agriculture defense against intentional contamination.

The items are broadly stated to allow for many different ways of interpreting and accomplishing them. To the best of your ability, please read each item in a way that is meaningful to your agency.

For example, when considering the first item, "Identify or assess potential security threats, risks, and vulnerabilities," your agency *may* have 1) conducted site inspections specifically related to the item; 2) developed a checklist for the site visit; or 3) researched a list of specific and known threats for a commodity. Any of these would count as an activity that fits for this item. Your agency may have done- or is planning- an activity that would meet the definition for the item. If this is true, click under the appropriate response option.
