	s surveillance system that would permit identification of any individual or institution is y for the purposes stated, and will not otherwise be disclosed or released without the

Assurance of Confidentiality: The voluntarily provided information obtained in this surveillance system that would permit identification of any individual or institution is collected with a guarantee that it will be held in strict confidence, will be used only for the purposes stated, and will not otherwise be disclosed or released without the consent of the individual, or the institution in accordance with Sections 304, 306 and 308(d) of the Public Health Service Act (42 USC 242b, 242k, and 242m(d)). Public reporting burden of this collection of information is estimated to average 70 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0666).

Patient Safety Component—Annual Facility Survey for IRF

Page 2 of 12 Facility Microbiology Laboratory Practices (completed with input from Microbiology Laboratory Lead) *1. Does your facility have its own on-site laboratory that performs antimicrobial bacterial susceptibility testing? ☐ Yes If No, where is your facility's antimicrobial susceptibility testing performed? (check one) ☐ Other local/regional, non-affiliated ☐ Affiliated medical center ☐ Commercial referral laboratory reference laboratory *2. For the following organisms please indicate which methods are used for: (1) Primary susceptibility testing and (2) Secondary, supplemental, or confirmatory testing (if performed). If your laboratory does not perform susceptibility testing, please indicate the methods used at the outside laboratory. Please use the testing codes listed below the table. **Pathogen** (1) Primary (2) Secondary **Comments** Staphylococcus aureus Enterobacteriaceae 10 = E test 1 = Kirby-Bauer disk diffusion 5.1 = MicroScan WalkAway 2 = Vitek (Legacy) 5.2 = MicroScan autoSCAN 12 = Vancomycin agar screen (BHI + vancomycin) 2.1 = Vitek 2 6 = Other broth micro dilution method 13 = Other (describe in Comments section) 3.1 = BD Phoenix 7 = Agar dilution method 4 = Sensititre *3. Has the laboratory implemented the revised cephalosporin and monobactam breakpoints □ Yes □ No for Enterobacteriaceae recommended by CLSI as of 2010? *4. Has the laboratory implemented the revised carbapenem breakpoints for □ Yes □ No Enterobacteriaceae recommended by CLSI as of 2010? *5. Does the laboratory perform a test for presence of carbapenemase? (this does not include □ Yes ☐ No automated testing instrument expert rules) If Yes, please indicate what is done if carbapenemase production is detected: (check one) ☐ Change susceptible carbapenem results to resistant ☐ Report carbapenem MIC results without an interpretation □ No changes are made in the interpretation of carbapenems, the test is used for epidemiological or infection control practices If Yes, which test is routinely performed to detect carbapenemase: (check all that apply) □ PCR □MBL Screen ☐ Modified Hodge Test ☐ Carba NP □ mCIM/CIM ☐ Rapid CARB Blue □ E test ☐ Other (specify): _____ ☐ Cepheid, BioFire array, Verigene® If Yes, does the laboratory have a policy to routinely notify any of the following when CP-CRE are detected? Physician □ No ☐ Yes Infection Control ☐ Yes □ No Continued >>

Facility Microbiology Laboratory Practices (continued)
*10. Antifungal susceptibility testing is performed on fungal isolates in which of the following situations: Candida albicans:
☐ Always ☐ Only when isolated from sterile sites (eg: blood, CSF, etc) ☐ Only when ordered by a clinician; ☐ Other (specify):
☐ Always ☐ Only when isolated from sterile sites (eg: blood, CSF, etc) ☐ Only when ordered by a clinician; ☐ Other (specify):
All other <i>Candida</i> species: ☐ Always ☐ Only when isolated from sterile sites (eg: blood, CSF, etc) ☐ Only when ordered by a clinician; ☐ Other (specify)):
*11. What is the primary testing method for <i>C. difficile</i> used most often by your facility's laboratory or the outside laboratory where your facility's testing is performed? (check one)
\square Enzyme immunoassay (EIA) for toxin
\square Cell cytotoxicity neutralization assay
☐ Nucleic acid amplification test (NAAT) (e.g., PCR, LAMP)
\square NAAT plus EIA, if NAAT positive (2-step algorithm)
\square Glutamate dehydrogenase (GDH) antigen plus EIA for toxin (2-step algorithm)
\square GDH plus NAAT (2-step algorithm)
\square GDH plus EIA for toxin, followed by NAAT for discrepant results
☐ Toxigenic culture (<i>C. difficile</i> culture followed by detection of toxins)
Infection Control Practices

(completed with input from Hospital Epidemiologist and/or Quality Improvement Coordinator)

*12. Number or fraction of infection preventionists (IPs) in facility:	www.cuc.gov/iii.
a. Total hours per week performing surveillance:	
b. Total hours per week for infection control activities other than	
surveillance: ——	
*13. Number or fraction of full-time employees (FTEs) for a designated hospital epidemiologist (or equivalent role) affiliated with your facility:	
*14. Is it a policy in your facility that patients infected or colonized with MRSA are rouprecautions while these patients are in your facility? (check one)	tinely placed in contact
\square Yes, all infected or colonized patients	
□ No	
\square Not applicable: my facility never admits these patients

Infection Control Practices (continued)
*17. Is it a policy in your facility that patients infected or colonized with suspected or confirmed ESBL-producing or extended spectrum cephalosporin resistant Enterobacteriaceae are routinely placed in contact precautions while these patients are in your facility? (check one)
\square Yes, all infected or colonized patients
□ No
\square Not applicable: my facility never admits these patients
If Yes, please check the type of patients that are routinely placed in contact precautions while I your facility (check one):
\square All infected or colonized patients
\square Only all infected patients
\square Only infected or colonized patients with certain characteristics (check all that apply)
\square Patients admitted to high risk settings
\square Patients at high risk for transmission
*18. Does the facility routinely perform screening testing (culture or non-culture) for CRE? \square Yes \square No
If Yes, in which situations does the facility routinely perform screening testing for CRE? (check all that apply)
☐ Surveillance testing at admission for all patients
☐ Surveillance testing of epidemiologically-linked patients of newly identified CRE patients (e.g., roommates)
☐ Surveillance testing at admission of high-risk patients (e.g., admitted from LTAC or LTCF)

If yes, in which situations does the facility routinely perform screening testing for MRSA_for non-NICU settings? CDC 57.151(Back), Rev.5, v9.2

 \square Surveillance testing at admission of patients admitted to high-risk settings (e.g. ICU)

*19. Does the facility routinely perform screening testing (culture or non-culture) for

MRSA for any patients admitted to non-NICU settings?

(check all that apply)

☐ Surveillance testing at admission for all patients		
\square Surveillance testing at admission of high-risk patients (e.g., admitted from LTAC or LTC	F)	
\square Surveillance testing at admission of patients admitted to high-risk settings (e.g. ICU)		
\square Surveillance testing of pre-operative patients to prevent surgical site infections		
\square Other (please specify):

Infection Control Practices (continued)		
*20. Does the facility routinely use chlorhexidine bathing on any patient to prevent	_	_
infection or transmission of MDROs at your facility? (Note: this does not include the use of such bathing in pre-operative patients to prevent SSIs)	☐ Yes	□ No
*21. Does the facility routinely use a combination of topical chlorhexidine <u>AND</u> intranasal mupirocin (or equivalent agent) on any patients to prevent infection or		
transmission of MRSA at your facility? (Note: this does not include the use of these	☐ Yes	□ No
agents in pre-operative surgical patients or dialysis patients)		
Antibiotic Stewardship Practices		
(completed with input from Physician and Pharmacist Stewardship Champions)		
*22. Our facility has a formal statement of support for antibiotic stewardship (e.g., a written policy or statement approved by the board).	□ Yes	□ No
*23. Facility leadership has demonstrated a commitment to antibiotic stewardship efforts by: (Chec	ck all that	apply.)
☐ Communicating to staff about stewardship activities, via email, newsletters, events, or other	avenues.	
☐ Providing opportunities for staff training and development on antibiotic stewardship.		
☐ Allocating information technology resources to support antibiotic stewardship efforts.		
☐ None of the above		ľ
*24. Our facility has a committee responsible for antibiotic stewardship.	☐ Yes	□ No
If Yes, membership in our facility's antibiotic stewardship committee includes: (Check all that a		
☐ Non-infectious diseases trained prescriber(s)	,	
☐ Infectious disease physician(s)		
☐ Pharmacist(s)		
☐ Nurse(s)		
☐ Infection preventionist(s)		

 \square Information technologist(s)

☐ Microbiologist(s)

MB No. 0920-0666

If Physician or Co-led is selected, which of the following describes your antibiotic stews (Check all that apply.)	ardship physi	cian leader?
☐ Has antibiotic stewardship responsibilities in their contract or job description		
☐ Is physically on-site in your facility (either part-time or full-time)		
☐ Completed an ID fellowship		
☐ Completed a certificate program or other coursework		
☐ None of the above		
If Pharmacist or Co-led is selected, which of the following describes your antibiotic sterleader? (Check all that apply.)	wardship pha i	rmacist
☐ Has antibiotic stewardship responsibilities in their contract or job description		
☐ Is physically on-site in your facility (either part-time or full-time)		
☐ Completed a PGY2 ID residency and/or ID fellowship		
☐ Completed a certificate program or other coursework		
☐ None of the above		
If Physician or Other, is there at least one pharmacist responsible for improving antibiotic use at your facility?	☐ Yes	\square No
*26. Our facility has a policy or formal procedure for: (Check all that apply.)		
Required documentation of indication for antibiotic orders.		
If selected: Our stewardship team monitors adherence to the policy or formal procedure for required documentation of indication for all antibiotic orders.	☐ Yes	□ No
☐ Required documentation of duration for antibiotic orders.		
☐ The treating team to review antibiotics 48-72 hours after initial order (i.e., antibiotic time	-out).	

The stowardship team to review courses of therapy for specific antibiatic agents and provide	lo roal timo	foodbook
The stewardship team to review courses of therapy for specific antibiotic agents and provid and recommendations to the treating team (i.e., prospective audit and feedback).	e real-time	теепраск
If selected: For which categories of antimicrobials? (Check all that apply.)		
☐ Cefepime, ceftizidime, or piperacillin/tazobactam		
☐ Ertapenem, imipenem/cilastatin, or meropenem		
 Ceftazidime/avibactam, ceftolozane/tazobactam, meropenem/vaborbactam, or other rebeta-lactam/beta-lactamase inhibitors 	ecently FD	A-approved
☐ Colistin or polymyxin B		
☐ Quinolones		
☐ Vancomycin		
☐ Daptomycin, linezolid, or other anti-MRSA agents		
☐ Anidulafungin, caspofungin, or micafungin		
☐ Isavuconazole, posaconazole, or voriconazole		
☐ Amphotericin B and/or lipid-based amphotericin B		
☐ None of the above		Continued >>
