

Justification for a Nonsubstantive Change
Form CMS-1696 Spanish Language Version 2018

What are we doing: Requesting OMB approval of the Spanish version of form CMS-1696, which has been updated with the recently approved changes to the English version.

Why are we doing it: CMS makes all OMB approved forms publicly available in English and Spanish languages. We are seeking OMB approval of the Spanish version of the form which incorporates the same changes made to the English form.

This action does not have any burden implications: CMS is seeking approval of an already approved form translated into another language. _
