SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to the Privacy Act of 1974, (5 U.S.C. 552a), the Department of Homeland Security (DHS) Citizenship and Immigration Services Ombudsman (CISOMB) is giving notice that it proposes to establish a new DHS system of records notice titled, "DHS/CISOMB-001 Virtual Ombudsman System of Records." This system of records will ensure the efficient and secure processing of information to aid the CISOMB in providing assistance to individuals, employers, and their representatives in resolving problems with U.S. Citizenship and Immigration Services (USCIS); identify areas in which individuals, employers, and their representatives have problems working with USCIS; and to the extent possible, propose changes to mitigate problems pursuant 6 U.S.C. 272.

CISOMB has developed the DHS/CISOMB-001 Virtual Ombudsman System of Records to ensure the efficient and secure processing of information and to aid the Ombudsman in assisting individuals and employers in making systemic recommendations to USCIS. The core of the DHS/CISOMB-001 Virtual Ombudsman System of Records is CISOMB's Web form 7001 which is a user interface Web-based form which will automatically convert information submitted by an individual or employer into a case within CISOMB's account within Internet Quorum/Enterprise Correspondence Tracking (IQ/ECT) system. IQ/ECT is the Department's enterprise-wide correspondence and case management tracking system. This system allows the Department's headquarters and components to manage cases and resolve issues in a coordinated and timely manner. For more information on IQ/ECT, please view the Enterprise Correspondence Tracking System PIA at <http://www.dhs.gov/privacy>. The system also enables CISOMB to segregate data into several categories to generate internal reports, provide customized feedback to individuals and employers, and supply real-time aggregated

statistical information for the CISOMB to assist individuals and employers with their problems with USCIS.

The purpose of this system is to provide efficient and secure case management and processing of information related to individuals and employers problems allowing the Ombudsman to make systemic recommendations to USCIS. The Department's authority for this collection is primarily Section 452 of the Homeland Security Act of 2002. This system will collect individuals' personal information to support the Ombudsman's efforts to make recommendations to USCIS pursuant to 6 U.S.C. 272. Efforts have been made to safeguard records in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. Strict controls have been imposed to minimize risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions. The routine uses posted cover sharing with the Department of Justice for legal representation; to Congress at the request of a constituent; to the National Archives and Records Administration for records retention and disposal; to agencies, organizations, and individuals for purposes of audit as well as for security breaches; to contractors of the Department in performance of their contractual duties; to appropriate agencies and entities for investigations and prosecutions; and to an attorney or representative who is acting on behalf of an individual. This system collects information under the Paperwork Reduction Act using the following form: DHS Form 7001, Case Problem Submission Worksheet and Supporting Statement Case Problem Submission, OMB Control Number 1601-0004, Expiration Date 01/01/2013.

This newly established system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by

the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to their records are put, and to assist individuals to more easily find such files within the agency. SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Transportation Security Administration (TSA) proposes to update and reissue a DHS/TSA system of records notice titled, DHS/TSA-013 Federal Flight Deck Officer Record System (FDORS), previously published on August 18, 2003 (68 FR 49496).

TSA's mission is to protect the nation's transportation systems to ensure freedom of movement for people and commerce. To achieve this mission, TSA is required to develop and adapt its security programs to respond to evolving threats to transportation security. In accordance with the biennial review of this system, the following modifications are being made:

- DHS/TSA is updating the system of records to incorporate five Department of Homeland Security (DHS) standard routines uses. One routine use will allow the release of information to appropriate agencies, entities, and persons when DHS/TSA suspects or has confirmed that the security or confidentiality of an information system of records has been compromised. Another routine use permits the release of information to the media when there exists a legitimate public interest in disclosing information. Release under this routine use will require the approval of the DHS Chief Privacy officer in consultation with counsel. The third routine use allows the release of information to a court, magistrate,

administrative tribunal or opposing counsel or parties where a federal agency is a party or has an interest in the litigation or administrative proceeding. The fourth routine use allows DHS/TSA to release information to a former employee when it is necessary to consult with the former employee regarding a matter that is within that person's former area of responsibility. The fifth routine use allows DHS/TSA to release information to appropriate entities where it would assist in the enforcement of civil or criminal laws.

- DHS/TSA is revising a routine use currently in by adding indirect air carriers and other facility operators as potential recipients of information from these systems when appropriate to address a threat or potential threat to transportation security or national security, or when required for administrative purposes related to the effective and efficient administration of transportation security laws.

- DHS/TSA is also revising a current routine use by adding indirect air carriers and other facility operators as potential recipients of information about individuals who are their employees, job applicants, or contractors, or persons to whom they issue identification credentials or grant clearances to secured areas in transportation facilities when relevant to such employment, application, contract, training or the issuance of such credentials or clearances.

- Finally, DHS/TSA has removed as a routine use the sharing of information with the Attorney General of the United States concerning violations of the Brady Handgun Violence Prevention Act as it is duplicative.

- The record source categories are being updated to reflect the use of commercial and public record databases and Web sites to obtain information regarding the identity of individuals who attempt to gain access to the sterile areas of the airport and for whom identity needs to be verified or individuals who are being vetted to qualify as federal flight deck officers.

- The retention and disposal section is updated to reflect the records retention schedules approved by the National Archives and Records Administration (NARA).

- The notification section was changed to reflect that inquiries regarding whether the applicable system contains records about an individual should be directed to TSA's Freedom of Information Act (FOIA) Office.

- The system manager and address were revised to reflect the current system manager.
