INTRODUCTION

INTRO1.   Hello, my name is _____ calling on behalf of the Centers for Disease Control and Prevention. We're conducting a nationwide study about head injuries in children and adults. You may have heard about head injuries in the news, in particular those experienced by children who play sports or military veterans. Let me assure you that this is not a sales call. Your phone number has been chosen at random to represent thousands of others in the country.

CONEADLT. You have been randomly chosen to participate in an important study. The Centers for Disease Control and Prevention (CDC) is sponsoring this telephone study of up to 10,000 people in the United States to find out about their experiences with head injuries in the past 12 months. Even if you haven't had an injury in the past 12 months, you can still participate in this important study.

The data we are collecting are very important, and will be used to guide national policies. The majority of respondents will complete the survey in less than 14 minutes.

There are minimal risks, and no known direct benefits to being in this voluntary study. To keep your information private, your name will never be connected to your answers. CDC will keep the information that you provide private and secure to the extent permitted by the law.   You can skip any question or stop the survey at any time. If you have questions or concerns about participating in the study, you may contact ICF, the independent health research company hired to conduct this survey. They can be reached toll-free at -1-844-604-4399. If you have any questions about your rights as a research participant, please contact Sophia Zanakos at 301-572-0239. This call may be monitored for quality assurance purposes.

ADOL
Thank you so much for providing information about your ["child's" OR "children's"] experiences with head injuries in the past 12 months.

We would like your permission to speak to your [AGE] year old child directly to ask him or her some questions about their experience, if any, with head injuries. Allowing your child to participate in this study will add to the CDC's knowledge about the circumstances surrounding head injuries and the groups most at risk for such injuries. There are minimal risks, and no known direct benefits to being in this voluntary study. To keep your child's information private, their name will never be connected with their answers. CDC will keep the information that your child provides private and secure to the extent permitted by the law.

Even if you agree now, your child may choose not to participate.

ADOL1. Hello, my name is _____ calling on behalf of the Centers for Disease Control and Prevention. We're conducting a nationwide study about head injuries in children and adults.
You may have heard about head injuries, especially those experienced by children who play sports.

Even if you haven't had an injury in the past 12 months, you can still participate in this important study. We have asked your parents to give their permission for you to participate; they have said "yes." However, even though your parents said "yes," you can still say "no" and not participate. And you can skip any question or stop the survey at any time. The majority of respondents will complete the survey in less than 7 minutes.

There are minimal risks, and no known direct benefits to being in this voluntary study. CDC will keep the information that you provide private and secure to the extent permitted by the law. Your name will never be connected to your answers. We will not share your answers with your parents.

If you have questions or concerns about participating in the study, you may contact ICF International, the independent health research company hired to conduct this survey. They can be reached toll-free at -1-844-604-4399. If you have any questions about your rights as a research participant, please contact Sophia Zanakos at 301-572-0239. This call may be monitored for quality assurance purposes.

May we begin?
