

## Bloodstream Infections Laboratory Practice Survey

The American Society for Microbiology (ASM) and the Centers for Disease Control and Prevention (CDC) are conducting a survey to learn about laboratories' current practices related to the effectiveness of rapid diagnostic tests to promote more accurate and timely administration of targeted antibiotic therapy for patients with bloodstream infections with the goal of improving practice and patient care. This survey will take approximately 20 minutes to complete; participation is voluntary.

The results from the survey will be compiled and shared in aggregate as a learning tool, presented at professional conferences, and potentially published in a professional journal in the field of laboratory science. All information collected in this survey will be kept in a secure manner; your IP address will NOT be retained.

Visit <https://www.surveymonkey.com/s/2CZ9HJQ> to complete the survey. Thank you for taking the time to complete this survey by (date to be determined upon OMB approval). Your feedback is important for guiding ASM and CDC's efforts to improve laboratory practice and patient care. Contact [clinmicro@asmusa.org](mailto:clinmicro@asmusa.org) with questions or concerns.
