Urine Collection, Storage and Preservation Laboratory Practice Survey

INTRODUCTION

Form Approved
OMB No. 0920-XXXX
Exp. Date xx/xx/20xx

Purpose of the Survey: This survey is being performed for the Centers for Disease Control and Prevention (CDC) and the American Society for Microbiology (ASM) to understand laboratories' current practices related to the collection, storage and preservation of urine for microbiological culture. The goal of the study is to improve the diagnosis and management of patients with urinary tract infection. This survey will take approximately 20 minutes to complete.

Security Information: All information collected in this survey will be kept in a secure manner. We ask you to include your CLIA number to ensure that only one response per laboratory is recorded. We also ask you to include your email address to follow-up if needed. Your CLIA number and email address will not be stored in a database and they will not be linked to your survey responses. Your IP address will NOT be retained.

Participation is voluntary; you are free to withdraw from this survey at any time. If at any point you do not want to continue, you can simply leave this website. If you do not click on the "done" button at the end of the survey, your answers and participation will not be recorded.

Asterisks (*): Questions marked with an asterisk require an answer before you can proceed to the next question.

How the findings will be used: The results from the survey will be compiled and shared in aggregate as a learning tool, presented at professional conferences, and potentially published in a professional journal in the field of laboratory science.

Contact Information: If you have concerns or questions about this survey please address them to clinmicro@asmusa.org.

Agreement: By beginning the survey, you acknowledge that you have read this information and agree to participate in this survey, with the knowledge that you are free to withdraw your participation at any time without penalty.

Public reporting burden of this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

Thank you for taking the time to complete this CDC and ASM survey. Your feedback is important for guiding CDC and ASM in their efforts to understand current laboratory urine practice. The survey should take approximately 20 minutes of your time. All answers will remain completely anonymous.

* 1	. Position/Title of Person Completing Survey:
* 2	. Email address:
* 3	. Laboratory Name:
* 4	. CLIA #:
* 5	. How did you learn about this survey?
\circ	Laboratory Response Network Request
\circ	ClinMicroNet
0	DivCNet
0	Clinical Microbiology Issues Update
0	Microbe, ASM's monthly news magazine
0	Other (please specify)
* 6	. Did you already fill out this survey?
0	Yes If answered "Yes", respondents have completed survey.
0	No
7. 0	Date:
	MM DD YYYY
12/0	5/2015 / /
