OMB No. 0920-0840

Expiration Date: XX/XX/XXXX

Formative Evaluation of Professional Development Resources

Attachment 3a

Web Survey

Public reporting burden of this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attn: OMB-PRA (0920-0840)

Professional Development: What Resources Do School Districts Use?

Purpose of the survey: The Division of Adolescent and School Health (DASH) at the Centers for Disease Control and Prevention (CDC) is working with an independent evaluation consulting firm, ICF, to learn more about what resources school districts are using to provide professional development (PD) to their middle school and high school teachers and other school staff.

As someone who works on these issues at the district level, you are being asked to help us learn about resources your school district is using to provide PD. We are specifically interested in face-to-face trainings, conferences, webinars, self-paced e-learning opportunities, observations, etc. that you use to prepare your staff to implement effective practices related to:

1. Classroom management
2. Supporting lesbian, gay, bisexual, and transgender (LGBT) students
3. Sexual health education

Additionally, we will ask you some questions about what kinds of training or resources you may need related to providing health services to students, including sexual and reproductive health services.

A total of 475 school districts are being asked to participate in this survey.

What you will do: You will use a computer to fill out a web-based survey. The question will indicate whether to select only one or more than one answer. You will not be asked to provide your personal information, and your survey responses will not be linked with your personal information.

Time needed: The survey should take about 20 minutes to complete.

Possible risks: Completing this survey will cause little to no risk to study participants. The survey is voluntary and you may choose to discontinue at any time for any reason. We will not use your name, and when summarizing results, the evaluation team will take care to ensure that all data is presented in aggregate in a manner that is not identifiable to a specific school district.

Benefits: Answering this survey will give you the chance to share information about PD resources being used in school districts. This information can promote broader use of effective PD resources and can inform development of new materials and adaptation of programs to enhance impact.

Deciding not to take the survey: Completing this survey is entirely voluntary. If you choose to complete the survey, you can stop at any time. Other staff and administrators in your district will have no knowledge of your decision to participate or not participate in this request.

Contacting the evaluator: You may call Catherine Lesesne at (404) 592-2230 if you have questions about this survey. If you have questions about your rights related to this survey you can call the ICF Review Board at (877) 556-2218.

Clicking "yes" below confirms that you agree to complete the survey. If you wish to stop at any time, click the "exit" button at the bottom of the screen. Thank you.

- ○ Yes - I have read the informed consent statement and agree to participate in the survey

Professional Development (PD):
PD is a set of skill-building processes and activities designed to assist targeted groups in mastering specific learning objectives. Such events are delivered in an adequate time span and may include trainings, workshops, and online or distance learning courses.
This first set of questions is about what type of PD resources related to classroom management your school district uses to prepare staff. Classroom management refers to the process by which teachers and schools create and maintain appropriate behavior of students in classroom settings.

This next set of questions is about what type of PD resources related to supporting LGBT (lesbian, gay, bisexual, and transgender) youth your school district uses to help prepare staff. Supporting LGBT youth refers to a variety of ways that schools promote a safe and supportive environment for LGBT youth, such as safe spaces, gay-straight alliances, and inclusive sexual health education, etc. LGBT youth are disproportionately more likely than their non-LGBT peers to experience a negative school environment and report negative health behaviors and experiences.
