Funding FOA#:_____

NCIPC Determination

Describe the purpose, methods, and outcomes of the project

Cooperative Agreement #: _______

Funding Mechanism

Describe the roles and responsibilities of CDC and any partner organizations (e.g., grantee, contractor).

NCIPC Determination

Proposed Project Dates: Start:	Project Title:
Applicability of Human Subiects Regulations Please check appropriate category: I. Activity is not research. Primary intent is public health practice: disease/injury control, surveillance, improvement of programs or services. Objectives focused on a specific population. A. Epidemic/endemic disease/injury control activity; collected data directly relate to immediate disease control needs (e.g., epi-aid). B. Routine disease/injury surveillance activity; data used for disease control program or policy purposes for a specific health condition/disease in a specific population and setting. (Includes disease reporting) C. Program evaluation/monitoring activity; data are used primarily for assessing, monitoring or improving a program, policy, or a communications activity (e.g., message testing) in a specific population/setting. D. Purchase orders or contracts for services or equipment. -OR- II. Activity is research but does NOT involve human subjects. Primary intent is to develop or contribute to generalizable knowledge, but data is obtained solely from non-human sources or not living individuals, or anonymous existing data collected for another purpose are being analyzed: A. Activity is research involving collection/analysis of data about health facilities or other organizations or units, which are not individual persons B. Activity is research involving data and/or specimens from deceased persons. -OR- III. Activity is research involving human subjects but CDC is not engaged. CDC employees including visiting scientists, fellows, and on-site contractors (but not off-site contractors or other collaborators Will NOT obtain consent or data by intervening or interacting with participates. Will NOT abay access to identifiable (including coded) private data or biological specimens NOTE: Once local IRB approval has been obtained please forward a copy (electronic preferred) to the NCIPC Human Subjects Coordinator for records keeping purposes. OR- IV. Activity is research involving human subjects
