

Non-material Change Request Justification (0970-0407)

The ORR-2 instrument is rearranged to align and match with On Line Data Collection (OLDC) system and instructions are rearranged to reflect instrument realignment.

Data points on the ORR-2 instrument are not changing, form is just rearranged to align with OLDC and instructions are arranged to match rearrangement on the instrument.

It is very important for grantees that data fields on the instrument match those in the OLDC since OLDC is the only method required by ACF to submit reports.

Attached is the correct form of the instrument and instructions.
