§ 3871f. Critical conservation areas

(a) In general

In administering funds under section 3871d(d)(3) of this title, the Secretary shall select applications for partnership agreements and producer contracts within critical conservation areas designated under this section.

(b) Critical conservation area designations

(1) Priority

In designating critical conservation areas under this section, the Secretary shall give priority to geographical areas based on the degree to which the geographical area—

(A) includes multiple States with significant agricultural production;

(B) is covered by an existing regional, State, binational, or multistate agreement or plan that has established objectives, goals, and work plans and is adopted by a Federal, State, or regional authority;

(C) would benefit from water quality improvement, including through reducing erosion, promoting sediment control, and addressing nutrient management activities affecting large bodies of water of regional, national, or international significance;

(D) would benefit from water quantity improvement, including improvement relating to—

(i) groundwater, surface water, aquifer, or other water sources; or

(ii) a need to promote water retention and flood prevention; or

(E) contains producers that need assistance in meeting or avoiding the need for a natural resource regulatory requirement that could have a negative impact on the economic scope of the agricultural operations within the area.

(2) Expiration

Critical conservation area designations under this section shall expire after 5 years, subject to redesignation, except that the Secretary may withdraw designation from an area if the Secretary finds the area no longer meets the conditions described in paragraph (1).

(3) Limitation

The Secretary may not designate more than 8 geographical areas as critical conservation areas under this section.

(c) Administration

(1) In general

Except as provided in paragraph (2), the Secretary shall administer any partnership agreement or producer contract under this section in a manner that is consistent with the terms of the program.

(2) Relationship to existing activity

The Secretary shall, to the maximum extent practicable, ensure that eligible activities carried out in critical conservation areas designated under this section complement and are consistent with other Federal and State programs and water quality and quantity strategies.

(3) Additional authority

For a critical conservation area described in subsection (b)(1)(D), the Secretary may use authorities under the Watershed Protection and Flood Prevention Act (16 U.S.C. 1001 et seq.), other than section 14 of such Act (16 U.S.C. 1012), to carry out projects for the purposes of this section.

SUBCHAPTER I—GENERAL PROVISIONS

§ 3901. Findings and statement of purpose

(a) Findings

The Congress finds that—

(1) wetlands play an integral role in maintaining the quality of life through material contributions to our national economy, food supply, water supply and quality, flood control, and fish, wildlife, and plant resources, and thus to the health, safety, recreation, and economic well-being of all our citizens of the Nation;

(2) wetlands provide habitat essential for the breeding, spawning, nesting, migration, wintering and ultimate survival of a major portion of the migratory and resident fish and wildlife of the Nation; including migratory

birds, endangered species, commercially and recreationally important finfish, shellfish and other aquatic organisms, and contain many unique species and communities of wild plants;

(3) the migratory bird treaty obligations of the Nation with Canada, Mexico, Japan, the Union of Soviet Socialist Republics, and with various countries in the Western Hemisphere require Federal protection of wetlands that are used by migratory birds for breeding, wintering or migration and needed to achieve and to maintain optimum population levels, distributions, and patterns of migration;

(4) wetlands, and the fish, wildlife, and plants dependent on wetlands, provide significant recreational and commercial benefits, including—

(A) contributions to a commercial marine harvest valued at over \$10,000,000,000 annually;

(B) support for a major portion of the Nation's multimillion dollar annual fur and hide harvest; and

(C) fishing, hunting, birdwatching, nature observation and other wetland-related recreational activities that generate billions of dollars annually;

(5) wetlands enhance the water quality and water supply of the Nation by serving as groundwater recharge areas, nutrient traps, and chemical sinks;

(6) wetlands provide a natural means of flood and erosion control by retaining water during periods of high runoff, thereby protecting against loss of life and property;

(7) wetlands constitute only a small percentage of the land area of the United States, are estimated to have been reduced by half in the contiguous States since the founding of our Nation, and continue to disappear by hundreds of thousands of acres each year;

(8) certain activities of the Federal Government have inappropriately altered or assisted in the alteration of wetlands, thereby unnecessarily stimulating and accelerating the loss of these valuable resources and the environmental and economic benefits that they provide; and

(9) the existing Federal, State, and private cooperation in wetlands conservation should be strengthened in order to minimize further losses of these valuable areas and to assure their management in the public interest for this and future generations.

(b) Purpose

It is the purpose of this chapter to promote, in concert with other Federal and State statutes and programs, the conservation of the wetlands of the Nation in order to maintain the public benefits they provide and to help fulfill international obligations contained in various migratory bird treaties and conventions with Canada, Mexico, Japan, the Union of Soviet Socialist Republics, and with various countries in the Western Hemisphere by—

(1) intensifying cooperative efforts among private interests and local, State, and Federal governments for the management and conservation of wetlands; and

(2) intensifying efforts to protect the wetlands of the Nation through acquisition in fee, easements or other interests and methods by local, State, and Federal governments and the private sector.
