UNITED STATES DEPARTMENT OF AGRICULTURE ANIMAL AND PLANT HEALTH INSPECTION SERVICE ANIMAL CARE

ANIMAL CARE Prelicense Phone Discussion with Dog (or Cat) Breeder/Dealer Applicant INTERNAL USE

Background and General Facility Questions Have you been licensed with USDA-APHIS-Animal Care before? If so, how long ago were you licensed and for what timeframe?		to ensure their well-being? (Safety hazards – electrical cords, toxic plants, choking hazards, etc.) Do you understand that all areas housing animals and items associated with their care will need to be inspected?
 Can you tell me what happened to cause this failure to renew your license? Tell me about your past inspection reports – was anything cited, how were the problems fixed Were there any minor issues or concerns that your inspector discussed with you previously but did not put on the report? What measures have you taken to fix those issues/concerns? Do you understand that there are no "teachable moments" or "minor issues" for these prelicense inspections? What breeds of dogs (or cats) do you have and how many are currently under your control or at your facility? How many of those animals are intact formulas. 	A	Indoor Facilities (not applicable to animals cohabitating with humans): How is the facility heated and cooled and how is the temperature regulated? What is the high temperature in the summer and the low temperature in the winter inside the facility? Tell me how you monitor the temperature and humidity levels? How is the facility ventilated? Doors, vents, windows, or some other auxiliary ventilation system? How is the facility lighted? Are there windows or skylights? What is the lighting schedule? Are interior surfaces including walls, floors, and ceilings impervious to moisture? What is used to make surfaces impervious to moisture? How often are surfaces replaced or repaired? (this applies to indoor kennels or indoor animal rooms — no interior of houses where humans and animals cohabitate) Which kinds of enclosures are present and what sizes do you use?
facility? How many of these animals are intact females and capable of being bred? Are these all of the animals and locations you are using or intending to use for regulated purposes? Have you ever pled 'no contest' or have you ever been found to have violated any Federal, State, or local laws or regulations pertaining to animals? When?		
Tell me about your facility and how and where your animals are housed.	>	 Outdoor Facilities (if applicable): Have you discussed the following issues with your attending veterinarian: Housing dogs (and cats) outside that are not acclimated to the temperatures common in your area; breeds of dogs (and cats) that cannot tolerate common seasonal temperature variations in your area; sick, infirm, old, and young dogs (and cats)? Have you received written approval from your
Animals Raised/Kept Inside the Home or Animals Cohabitating with Humans (Reference Animal Welfare Inspection Guide 4-22 "Dogs and Cats in Residence Inspection") Do you keep or raise animals in your home? Are these animals limited to a specific area of the home or do they have unlimited access?		
Do you have a special room or area in your home that is set aside specifically for the animals – whelping room, nighttime sleeping room, etc.? If you do – do you understand that this animal area will need to meet the requirements of indoor housing including surfaces, ventilation, etc.? (need to refer to Indoor housing facility questions at this point)		attending veterinarian to do so? Do your enclosures provide shelter from the heat and cold? Is there protection from direct sunlight, rain, wind, and snow? Are there wind and rain breaks at the entrance of shelter structures?
Tell me about any enclosures you may use for the animals – (e.g. "vari kennels", playpens, stack caging). Are they large enough to meet the floor space		When do you provide clean and dry bedding for the shelter structures? What is the bedding and how often is it replaced or refreshed?
requirements of a primary enclosure? Do you understand that the areas of the home that are available to the animals must be kept clean and safe		Are surfaces in contact with the dogs (and cats) impervious to moisture? What is used to make surfaces impervious to moisture?

	do you use?		Use these as guidance:
			How do you manage pest control?
	Veterinary and Health Issues		How is waste fluid drained?
	Who is your AV?		 How is food stored in the kennel?
	Has your attending veterinarian visited recently?		How are extra bags of food and extra bedding
	When?		material stored?
	What is your formal arrangement? How have you given your AV appropriate authority to		 How is housekeeping maintained?
	ensure that adequate care is provided to your		 What is your routine maintenance plan?
	animals?		Who will be caring for the animals, apart from you?
	Do you have a current, written program of veterinary		Have they had training in the care and husbandry
	care (PVC) signed by your AV?		of the animals and are they familiar with:
	Does the written PVC reflect what you actually do at		□ your Program of Veterinary Care□ your exercise plans
	your facility?		o
	Does the PVC cover routine medications,		o ☐ any other procedures you have in place to
	vaccinations, routine treatments including routine		ensure compliance
	dental care, and when needed, euthanasia?		Are there days and/or times during the week when
	Do you have any expired or unlabeled medications?		you are unavailable for routine inspections?
	How often do you observe each animal and what do		Is there someone else who you can authorize to be
_	you do when problems are discovered?		available for routine inspections?
Ш	How are problems recorded and communicated to		Are you licensed with the State?
	your AV?		If so, for how long?
Ц	How do you maintain medical records?		When was your last inspection?
Ш	What is your plan for nail and hair coat maintenance; eye, ear, and dental care; and flea and tick		Were any issues identified?
	prevention?	_	If so, have they been corrected?
	Explain your exercise program for the dogs.	Ц	Do you understand the difference between regulated
	How is it scheduled and how is it documented?		and unregulated activity?
	 Do you have a play yard or exercise area that is 	Ц	Do you understand that you cannot conduct regulated activity until you have a USDA license?
	securely fenced?	П	Do you have your copy of the Animal Welfare Act
	 Is it free of debris, weeds, and dangerous 	Ш	("the blue book" or the CD)?
	objects?		Have you read through the regulations and standards
	 Do you have this exercise plan written down? 		that apply to your facility and to your situation?

	Do you understand that you are legally responsible for complying with all of them?
	Are you aware that once the first prelicense inspection is conducted, you have 90 days to complete the inspection process with a maximum of three inspections?
	 It can take a week or two to schedule second and third inspection so please allow for that time to schedule inspections.
	When the first prelicense inspection is conducted (please allow at least 2-4 hours), some educational components and tools will be presented. Once that is completed, a physical inspection of the facility will be conducted.
	Do you understand that 100% compliance is required to pass and receive a license?
	Do you feel that you are ready for an inspection?
	Do you have any questions?
>	Additional Topics for Cat Facilities
	Describe your housing for the adult cats – are you using individual enclosures or colony housing?
	What type of queening enclosures and boxes are you using?
	What size enclosures are you using for adults and for queens and kittens?
	What is the height of the enclosures?
	What type of litter and litter pans are you using?
	Describe the resting surfaces in the enclosures – how many are in each enclosure and what height are they
