RETRIEVABILITY:

Records are retrieved by name and/or social security number.

SAFEGUARDS:

Privacy Act data, i.e., data defined by and protected under the Privacy Act of 1974 ([5 U.S.C. 552a](#)), is maintained in the NIST Associate Information System (NAIS) as distinct and separate from non-Privacy Act data in that it cannot be accessed or retrieved except by authorized personnel with a mission-related need-to-

know. Access to NAIS Privacy Act data by NIST staff must be authorized by the NAIS System-of-Records Manager on a mission-related, need-to-know basis. Levels of access to NAIS Privacy Act data as well as access itself are controlled by the NAIS privacy/security/system access architecture that is implemented through “report writer” software.

Levels of access to NAIS Privacy Act data are granted to individuals based on NA processing roles and responsibilities that define specific mission-related needs-to-know. Included in these roles and responsibilities are the following:

- a. Initiators—those creating and inputting new data records.
- b. Approving Officials—those signing off on NA agreements.
- c. Reviewing Officials—those reviewing NA agreements but not signing off.
- d. Records Updaters—those directed to update or correct information in NA records.

Physical security and IT security of the NAIS IT assets is assured by all relevant NIST policies and procedures that are applicable to the e-Approval infrastructure of which NAIS is an IT application.

RETENTION AND DISPOSAL:

Current NIST and Department policies and regulations concerning the retention and disposition of Privacy Act data apply.
