

Maternity Practices in Infant Nutrition and Care

2018

Public reporting burden of this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Form Approved OMB #0920-0743

EXP.DATE: MM/DD/YYYY

Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC, Reports Clearance Officer, 1600 Clifton Road, MS D-74, Atlanta, GA 30329, ATTN: PRA (0920-0743). Do not send the completed form to this address.

Therefore, you have no reasonable expectation of privacy. Any communication or data transiting or stored on this system may be disclosed or used for any lawful Government purpose.

About this survey:

The Centers for Disease Control and Prevention (CDC) invites you to participate in a national survey of newborn feeding practices at hospitals in the United States and Territories that provided maternity care in the past year. The survey is being conducted for CDC by Battelle Health & Analytics, a national survey and research organization with extensive experience in the collection of health data. Participation of every hospital providing maternity care makes this survey representative of all maternity care hospitals in the United States and Territories. If your hospital provided maternity care at multiple locations, only report data for the specific physical location listed in your email invitation.

Your participation in the survey is completely voluntary. We will mail a hard copy of your hospital's results to four (4) leadership positions at your hospital. These positions are the Director of Hospital Quality Improvement, Obstetrics Medical Director, Pediatrics Medical Director, and the Nurse Manager for Mother Baby Services.

Prior to submitting the survey, you will have the opportunity to provide your contact information so that you, the survey recipient, will receive one (1) electronic copy of your hospital's results. Providing your contact information is voluntary; results will be mailed to your hospital if you do not provide an email address. Your contact information will in no way be connected to survey responses or scores.

How long will this survey take to complete?

The survey will take about 30 minutes to complete.

How will this information be used?

The purpose of this survey is to learn about newborn feeding practices at hospitals in the United States and Territories. After data collection is complete, your hospital will receive an individualized report containing a summary of survey results. Data will also be used to generate state-specific reports, national aggregate data tables, and may be used to answer other questions. Data may be released for additional approved purposes and may be shared with state health departments for the development of public health programs. Information from this survey will also assist CDC with program planning.

Are our survey responses kept confidential?

Your responses will be treated in a secure manner and will not be disclosed unless required by law. Your name, hospital name, and any other personal identifiers will not be included in either oral or written presentation of survey results. Responses will only be reported in summary form so individual responses cannot be identified.

Survey Instructions:

Thank you for participating in this survey. You have been identified as the survey recipient for your hospital, which means that only you have access to the unique link to complete and submit the 2018 mPINC survey for your hospital.

We are asking you to fill out the survey with data from the most recent calendar year (January 1, 2017 - December 31, 2017) or your hospital's fiscal year. <u>Unless otherwise specified, questions on the survey are asking about healthy newborns who are discharged to home</u> (i.e., not transferred or admitted to the Special Care Nursery (SCN) or Neonatal Intensive Care Unit (NICU)).

This survey contains 6 core sections and an additional section for hospitals with an SCN or NICU. Each section should be completed by the most knowledgeable and appropriate staff. For example, the Mother-Baby Unit supervisor may be better able to answer one section, while the Lactation Services coordinator or NICU nurse manager may be better able to complete another section. See the table below for a list of people who may be helpful with completing different sections of the survey.

Titles of staff who may be appropriate to fill out sections of the survey include:

Mother-Baby Unit Manager / Supervisor
Labor and Delivery Unit Manager / Supervisor
Lactation Services Coordinator / Lactation Specialist
NICU Nurse Manager
Staff nurse
Database Manager / Coordinator
Maternal and Child Health Physician Leaders

Some questions ask you to enter exact percentages; however, if your hospital does not formally track this information, please provide your best estimate.

Click <u>here</u> to download a blank copy of the survey. This version should only be used as a worksheet to record responses prior to entering and submitting them online. <u>No paper copies of the survey will be accepted.</u>

You may wish to work on this survey over a period of time, particularly if it will be completed by multiple staff. You can view all sections and pages in the survey and you may go back and forth and edit responses as needed. Your responses will only be saved after you have clicked **Next** at the bottom of the page. If you cannot complete the survey all at one time, click **Save**, and return at a later time. When you

return, you may continue where you left off. Before submitting you will be able to review the questions and your answers. You will be notified before your final submission if you have missed any items.

Survey Tips:

- Click here to download/print the survey.
- Move between sections of the survey on the **Table of Contents** page by clicking to the right of the section and then clicking **Next**.
- To move back and forth between questions within a section use the **Next** and **Previous** buttons.
- Do not click on your browser's back or forward button while taking the survey.
- Throughout the survey there will be pop-ups providing you with definitions and explanations; access these by hovering your mouse over the underlined text.

What to do if you have questions:

If you have any questions about the survey, please call the Battelle Survey Line toll free at 1 (866) 826-4176. If you have any questions about your rights as a research participant, please contact the Human Protections Administrator of the Battelle Institutional Review Board toll free at 1 (877) 810-9530 ext. 500.

What to do when you have completed the survey:

When you get to the end of the survey, you can review your answers. When you are satisfied with your answers, return to the table of contents and click **Complete Survey**. This action will send the survey to a secure database. Once you have submitted the survey, you will not be able to return to the survey. You will have the opportunity to download a completed copy of the survey for your records after it is submitted. Please note that you must select **Complete Survey** to complete the survey process and receive a Benchmark Report for your hospital. Surveys that are not submitted are considered incomplete and will not be eligible to receive a hospital Benchmark Report.

Thank you for your contribution!

SURVEY ITEMS	Hovers, skip patterns, & notes
SECTION A: Hospital Data	
This section is about deliveries and general hospital information. Mouse over underlined text for a defin	nition or more information.
A1	
What type of facility is your hospital? (select 1 option only)	
government hospital	
non-profit hospital	
private hospital	
military hospital	
A2	
Is your hospital a teaching hospital (e.g., medical residents, nursing students)?	
YES	
NO NO	
INO	
A3	
Is your hospital currently designated as "Baby-Friendly" by the Baby-Friendly Hospital Initiative	
(BFHI)?	
(DETII):	
YES	
NO

are cared for in your specialty unit (Special Care Nursery, Neonatal Intensive Care Unit, Regional Neonatal Intensive Care Unit)?						placed prone directly on the mother's, father's, or other's bare chest or abdon The caregiver is then wrapped in a blan or other cloth to secure the newborn against his or her chest.

A12

Are the following included in a <u>written</u> policy about management of Neonatal Abstinence Syndrome (NAS) at your hospital?

	Yes	No
Verbal screening for maternal substance use (e.g., asking in the medical history)		
Toxicology screening for maternal substance use (e.g., urine, meconium, hair, cord		
blood)		
Use of a standardized tool to evaluate NAS symptoms (e.g., Modified Neonatal		
Abstinence Scoring System, Finnegan Score)		
Promotion of breastfeeding or provision of expressed human milk as a		
nonpharmacological treatment of NAS		
Promotion of [rooming-in] as a nonpharmacological treatment of NAS		
Promotion of [skin-to-skin contact] or [Kangaroo Care] as a nonpharmacological		
treatment of NAS		
Pharmacologic treatment of NAS		

(no skip pattern)

Rooming-in is a practice where mother and newborn are in close proximity.

Kangaroo Care refers to skin-to-skin care where a newborn, often premature, is placed prone directly on the mother's, father's, or other's bare chest or abdomen. The caregiver is then wrapped in a blanket or other cloth to secure the newborn against his or her chest.

Skin-to-skin contact: The naked newborn is placed prone directly on the mother's bare chest or abdomen, with or without a cap/blanket.

SECTION B: SPECIAL CARE NURSERY (SCN) AND / OR NEONATAL INTENSIVE CARE UNIT (NICU)

This section is about practices in your hospital's SCN and / or NICU. Mouse over underlined text for a definition or more information. The primary contact should consult with an SCN or NICU colleague before answering these questions.

B1

What is the highest level of neonatal care provided at your hospital? Click for:

[Definitions, Capabilities, and Provider Types: Neonatal Levels of Care]

The remaining questions in Section B only apply if your hospital has Level II-Level IV neonatal care.

Level I: Well newborn nursery	
Level II: Special care nursery	
Level III: Neonatal Intensive Care Unit	
Level IV: Regional Neonatal Intensive Care Unit	

Pop up with the AAP table: "Definitions, Capabilities, and Provider Types: Neonatal Levels of Care"

If level 1 is selected, pop up should appear stating, "You've selected Level 1. The rest of the questions in this section do not apply. Click OK to return to the Table of Contents. If you selected Level 1 by mistake, please close the window, return to the question and correct your answer."

This section is only available to those who have a Level 2-4 SCN or NICU from Item **B1**. If they select Level 1 for B1, skip the remaining items in Section B and go right to Section C.

You've selected Level 1. The rest of the questions in this section do not apply. Click **Next** to return to the Table of Contents. If you selected Level 1 by mistake, please click **Previous**, return to the question and correct your answer

B2	
How many mothers with newborns in your hospital's SCN or NICU	

	(0-19%)	SOME (20-49%)	(50-79%)	MOST (80% +)
are advised to provide human milk as a				
component of their newborn's medical care?				
are advised to breastfeed or express their milk				
8 or more times every 24 hours to establish and				
maintain their milk supply?				
begin expressing and collecting their milk				
within 1 hour of their newborn's birth (among				
healthy, stable mothers)?				
are shown techniques for cleaning breast				
pump equipment?				
receive written instructions for cleaning breast				
pump equipment?				
receive written instructions for safe storage				
and transport of expressed milk?				

B3Among SCN/NICU newborns eligible for [Kangaroo Care], how many practice Kangaroo Care?

Not offered at our hospital	Few (0-19%)	Some (20-49%)	Many (50-79%)	Most (80% +)

Kangaroo Care refers to skin-to-skin care where a newborn, often premature, is placed prone directly on the mother's, father's, or other's bare chest or abdomen. The caregiver is then wrapped in a blanket or other cloth to secure the newborn against his or her chest.

If "Not offered" is selected, B4 is skipped

SECTION F.	FDI ICATION	AND SUPPORT	OF MOTHERS
SECTION E.	EDUCATION	AND SUPPURI	OF IND LUCKS

This section is about information taught to mothers and caregivers about feeding and caring for their newborn and support provided to mothers by staff. Mouse over underlined text for a definition or more information.

E1

How many mothers and support persons are taught strategies for [safe sleep] with their newborn at the hospital (regardless of feeding method)?

Safe sleep practices: infants are placed on their backs on a firm, flat surface that is free of any items.

FEW
(0-19%
\smile

E2

How many breastfeeding mothers are taught or shown how to . . .

	(0-19%)	(20-49%)	(50-79%)	(80% +)
recognize and respond to their newborn's				
[feeding cues]?				
position and latch their newborn for				
breastfeeding?				
assess effective breastfeeding by observing				
their newborn's latch and the presence of				
audible swallowing?				
assess effective breastfeeding by observing				
their newborn's elimination patterns (i.e., urine				
and stool output and stool character)?				
breastfeed [as often and as long] as their				
newborn wants, [without restrictions]?				
hand express their breast milk?				

Feeding cues: Signs the baby is ready to feed, including increased alertness, flexion of the extremities, mouth and tongue movements, cooing sounds, rooting, bringing fist toward the mouth, or sucking on fingers / hand.

As often and as long: Also known as 'cuebased' or 'on-demand' feeding.

Without restrictions: Without setting a schedule for how long baby should be at the breast and/or the amount of time that should pass between feeds.

E6											In-person follow-up visits:

What discharge support does your hospital routinely provide to breastfeeding mothers?

•		Yes	No
•	[In-person follow-up visits/appointments for lactation support]		
•	Personalized phone calls to mothers to ask about breastfeeding (not		
	automated calls)		
•	[Formalized, coordinated referrals to lactation providers in the		
	community when additional support or follow-up is needed]		
•	[Breastfeeding information and resources]		

Breastfeeding assessments, support, and weight checks at a post-discharge home, hospital, clinic, or office visit; breastfeeding-specific support group in a hospital wellness center

Formalized, coordinated referrals:
Scheduling an appointment on the
mother's behalf with a lactation provider,
WIC peer counselor, or home visiting
program; providing a referral for insurance
coverage; providing access to lactation
support via interactive smartphone app or
other online/remote support; writing a
prescription for lactation support

Breastfeeding information and resources: Educational booklets/pamphlets, informational smartphone app or other online information, list of community resources, breastfeeding assessment sheet/feeding log, warm-lines E7
Does your hospital collaborate with [WIC] in any of the following ways?

Yes	No
	Yes

WIC: The Special Supplemental Nutrition Program for Women, Infants, and Children

Written agreement: Such as a memorandum of understanding (MOU)

SECTION F: STAFFING

This section is about maternity-care staff and providers who work in your maternity-care unit, as well as staff and provider responsibilities and training. Mouse over underlined text for a definition or more information.

F1

How many nurses have met the following requirements?

	FEW	SOME	MANY	MOST
	(0-19%)	(20-49%)	(50-79%)	(80%+)
Minimum 15 hours of				
[didactic breastfeeding education]				
Minimum 5 hours				
[competency-based clinical training]				

didactic breastfeeding education: Lectures, conferences, classroom, and online courses.

competency-based clinical training: Training and mentorship necessary to attain competence in managing and supporting breastfeeding.

F2

How often does your hospital require that nurses complete [continuing education] on breastfeeding support and lactation management?

At least once per year	
Less than once per year	
Not required	

Participation in educational and training activities that improve the care that is provided by maternity staff to mothers and infants.

_

How often are nurses [formally assessed] for clinical competency in breastfeeding support and lactation management?

At least once per year	
Less than once per year	
Not required	

Systematic evaluation of staff's hands-on ability to support breastfeeding mothers, and may include demonstration of competency at an annual skills lab or observation by a lactation specialist.

F4

Are nurses required to demonstrate competency in the following skills?

	Yes	No
Placement and monitoring of the newborn [skin-to-skin] with the mother immediately		
following birth		
Assisting with effective newborn positioning and latch for breastfeeding		
Assessment of milk transfer during breastfeeding		
Assessment of maternal pain related to breastfeeding		
Teaching hand expression of breast milk		
Teaching safe formula preparation and feeding		
Counseling the parents/caregivers on [safe sleep practices] for their newborn during the		
hospital stay		
Counseling the mother on the importance of exclusive breastfeeding for 6 months		

skin-to-skin: the naked newborn is placed prone directly on the mother's bare chest or abdomen, with or without a cap/blanket.

Safe sleep practices: infants are placed on their backs on a firm, flat surface that is free of any items.

How many of the following health care providers who care for breastfeeding mothers and newborns complete a minimum of 3 hours of [breastfeeding management education]?

	Not Applicable (none on staff)	FEW (0-19%)	SOME (20-49%)	MANY (50-79%)	MOST (80%+)
Obstetricians					
Pediatricians					
Family Practice Physicians					
Certified Nurse Midwives					
Nurse Practitioners /					
Advance Practice Registered					
Nurses					
Not including RNs					
Medical Residents					

Educational activities that give health care providers an understanding and knowledge of the benefits of exclusive breastfeeding, physiology of lactation, how their field of practice impacts lactation, and how to find out about safe medications for use during lactation.

F6

How many full time equivalents (FTEs) are International Board Certified Lactation Consultants (IBCLCs) dedicated exclusively to in-patient lactation care?

__._ FTEs (if less than 1 FTE, please record as a decimal.

For example, 40 hours per week = 1 FTE,

20 hours per week = .5 FTEs,

and 10 hours per week = .25 FTEs.)

SECTION G: POLICIES AND PROCEDURES This section is about hospital policies and procedures. Mouse over underlined text for a definition or more information.					
Does your hospital record (keep track of) [exclusive breastfeeding] throughout the entire hospitalization?	includes expressed human milk from the mother or from a donor milk bank. Medicines, minerals, and vitamins may also				
YES NO	be given, but no formula, water, or other preparations.				

G2 Which of the following are included in a <u>written policy</u> (or policies) at your hospital?

		Yes	No
Policy	documentation of medical justification or informed parental consent for giving [non breast milk feedings]		
requiring	to breastfed newborns		
	formal assessment of staff's clinical competency in breastfeeding support		
	formal, in-service, breastfeeding-related staff training		
	documentation of prenatal breastfeeding education		
	staff to teach mothers breastfeeding techniques, including how to manage common difficulties		
	staff to show mothers how to express breast milk		
	placement of newborns skin-to-skin with their mother at birth or soon thereafter		
	purchase of infant formula and related breast milk substitutes by the hospital at fair market value		
	staff to provide mothers with resources for breastfeeding support after discharge		
	Staff to teach mothers about strategies for [safe sleep] while [rooming-in] at the hospital		
	the option for mothers to room-in with their newborns		
Policy	distribution of marketing/education materials, samples, or gift packs by the facility that include or		
prohibiting	promote breast milk substitutes (infant formula), infant feeding supplies, or infant formula coupons		

Non breast milk feedings: formula, water, glucose water
Safe sleep practices: infants are placed on their backs on a firm, flat surface that is free of any items.
Rooming-in is a practice where mother and newborn are in close proximity.

•	-	^
	_	

How many health care providers who have <u>any</u> contact with pregnant women, mothers, and/or newborns have been oriented on the hospital's infant feeding policies?

Our hospital does not have official infant feeding practice policies.	Few	Some	Many	Most
	(0-19%)	(20-49%)	(50-79%)	(80% +)

G4

How does your hospital acquire each of the following:

Consistent with hospital-wide vendor policy

	HOSPITAL PURCHASES at [fair market price]	HOSPITAL RECEIVES free of charge	UNKNOWN or unsure
Infant formula			
Bottles, nipples, pacifiers			

G5

Does your hospital give mothers any of the following items free of charge, <u>as gifts or free samples</u> (not including items prescribed as part of medical care)?

	Yes	No
Infant formula (including formula discharge packs)
