

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0299. The time required to complete this information collection is estimated to average 8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE  
VETERINARY SERVICES

**NATIONAL LIST OF REPORTABLE ANIMAL DISEASES (NLRAD)  
NATIONAL ANIMAL HEALTH REPORTING SYSTEM (NAHRS)  
MONTHLY REPORT FORM**

**INSTRUCTIONS**

These instructions refer to completion of the NLRAD NAHRS form by the State Animal Health Officials (SAHO) or representatives. NLRAD NAHRS reporting is completed through the NAHRS Web Reporting Tool: <https://vsapps.aphis.usda.gov/NAHRS>. This document reflects the reporting required in the NAHRS Web Reporting Tool and can be utilized to assist in completing reports or as a guide for reporting requirements. Additional information on the NLRAD NAHRS, reporting criteria, and utilizing the NAHRS Web Reporting Tool can be found at: [https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/monitoringand-surveillance/sa\\_disease\\_reporting/ct\\_info\\_for\\_participants](https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/monitoringand-surveillance/sa_disease_reporting/ct_info_for_participants)

For each month, please report disease presence or absence for the entire month. Monthly reports are requested by the 20th of the following month. If you receive reports on out-of-state submissions, **REPORT ONLY CASES THAT OCCURRED IN YOUR OWN STATE.**

If you received a report of a case which fits the NAHRS criteria, check '**YES**' under PRESENT. If you received a report of a case which does not fit the NAHRS criteria, but you have additional evidence to support the presence of confirmed disease, check '**YES**' under PRESENT. If you received no reports in the investigation of a suspected disease which fit the NAHRS criteria and you have no further supporting evidence of the presence of confirmed disease, check '**NO**' under PRESENT (*e.g., all investigations for a given disease were negative.*) A '**NO**' report, in relation to an endemic disease, indicates that from information available there were no reports of confirmed disease occurrence, and does not infer the endemic disease does not occur in the State.

Most endemic diseases include both a presumptive and definitive level of confirmation. If a case meets the NAHRS confirmed (*definitive*) criteria for presence of disease, record it as present. If a case does not meet the NAHRS confirmed (*definitive*) criteria, but meets presumptive criteria—report the case if it is considered a probable case and 'presumptive' can be indicated in the comment section. The disease reporting criteria are minimum standards and additional information can be utilized to report i.e. epidemiological link, or other non-listed laboratory tests.

Add any additional information which you feel may be of value or pertinent in the COMMENTS column e.g. level of lab diagnosis; presumptive vs. confirmed; environment disease occurrence located in – backyard, feral, etc.; and any other clarifying information needed.

If a report of a case is received after the report has been sent or edits to the report are required, notify the NAHRS administrator at [NLRAD.NAHRS@aphis.usda.gov](mailto:NLRAD.NAHRS@aphis.usda.gov) to update the information.

## SECTION I - NAHRS REPORT FOR:

State:	Month:	Year:
--------	--------	-------

NOTE: Diseases below that are indicated as Foreign Animal Disease (FAD) are those diseases that are considered foreign to the United States. Reporting the presence of a FAD occurrence is made after State-Federal coordination.

## SECTION II – DISEASE OCCURRENCE INFORMATION:

WORLD ORGANIZATION FOR ANIMAL HEALTH (OIE) NUMBER - DISEASE NAME	PRESENT		COMMENTS
	YES	NO	
<b>BOVINE</b>			
<b>A010</b> Foot-and-Mouth Disease ( <i>all FMD, Viruses O, A, C, SAT 1, SAT 2, SAT 3, Asia 1</i> )			FAD
<b>A020</b> Vesicular stomatitis ( <i>VS, Viruses Indiana, New Jersey, or not typed</i> )			
<b>A040</b> Rinderpest			FAD
<b>A060</b> Contagious bovine pleuropneumonia ( <i>Mycoplasma mycoides mycoides</i> )			FAD
<b>A070</b> Lumpy skin disease			FAD
<b>A080</b> Rift Valley fever			FAD
<b>A090</b> Bluetongue			Indicate level of diagnostics – i.e. serology Type ( <i>if known</i> ):
<b>N001</b> Crimean Congo hemorrhagic fever			FAD
<b>2001</b> Akabane ( <i>congenital arthrogryposishydranencephalaly syndrome</i> )			FAD
<b>B051</b> Anthrax ( <i>Bacillus anthracis</i> )			
<b>B052</b> Aujeszky's disease ( <i>Pseudorabies</i> )			
<b>B053</b> Echinococcosis / Hydatidosis ( <i>E. granulosus, E. multilocularis, E. oligarthrus, E. vogeli</i> )			
<b>B055</b> Heartwater ( <i>Cowdria ruminantium</i> )			FAD
<b>B057</b> Q fever ( <i>Coxiella burnetii</i> )			
<b>B058</b> Rabies

**SECTION III – ADDITIONAL EQUINE INFECTIOUS ANEMIA TESTING INFORMATION:**

1. Number of EIA tests performed in a reporting month:

---

2. Number of horses tested in reporting month (*leave blank if unavailable*):

---

3. Number of horses tested positive in reporting month:

---

4. Number of premises (*epidemiological units*) with positive(s) in reporting month (*if premises previously reported in calendar year do not report, and if not other positive premises indicate – 0*):

---

5. Number of total horses quarantined in State for positive EIA test:

---

**Instructions for Additional Equine Infectious Anemia Questions:**

- 1. Number of EIA tests performed in reporting month:** Report the total number of EIA tests performed the reporting month for horses that reside in your State. This includes all tests on resident horses conducted both at in-state and out-of-state labs.
- 2. Number of horses tested in reporting month (*if unavailable leave blank*):** Report the number of horses tested for EIA for the reporting month. Do not include repeat EIA tests on the same horse in the calendar year. **If this information is unavailable, leave this blank.**
- 3. Number of horses tested positive in reporting month:** Report the total number of newly identified horses tested positive for EIA in the reporting month. Do not include repeat testing of an already identified positive horse.
- 4. Number of premises (*epidemiological units*) with positive(s) in reporting month (*If premise previously reported in calendar year do not report, and if no other positive premises indicate -- 0*):** Identify the number of premises (*epidemiological units*) with positive EIA horses for the calendar year. If a premise has been reported as positive in a previous monthly report, do not include in number of premises positive in reporting month. If the only positive premises is a premises identified on a previous monthly report for the calendar year, report '0'. Example: if a premise has one positive horse in June and additional testing in July identifies 3 additional positive horses on the same premises – for July indicate 3 positive horses and '0' for number of premises.
- 5. Number of total horses quarantined in State for positive EIA test:** This is the total number of EIA quarantined horses at the end of the previous month with the addition of newly identified EIA positive horses and minus any EIA quarantined animals that were destroyed or died in the reporting month.
