

Request for Non-Substantive Change to 2018 End-to-End Census Test – Peak Operations
OMB Control No. 0607-0999
U.S. Department of Commerce
U.S. Census Bureau

Purpose

This is a request for a nonsubstantive change to the 2018 End-to-End Census Test – Peak Operations package. The change is to add the operational assessment study plans to the materials included in the package.

Background

As documented in the Supporting Statement A for this package, not all the assessment study plans were completed at the time of clearance of the test. These were to be added to the package as they completed. As of November 23, 2018, all assessment study plans have been completed through all formal approvals, so this request is to add to this package the remaining study plans that were not previously included. These study plans are:

- Group Quarters Enumeration
- Internet Self-Response
- Paper Data Capture
- Non-ID Processing
- Census Questionnaire Assistance
