

Subject: Comparative Usability of Robotic Control Systems for Manufacturing Based Human Robot Interaction Survey

OMB Control #0693-0043

Expiration Date 12/31/2018

We are seeking participants for research study on Human Robot Interfaces and Robotic Control Systems. The study consists of interacting with two different robotic interfaces and completing a 4-minute post task survey on your experience with the interfaces. Participants must be at least 18 years of age and have basic knowledge of computers. The study is anonymous and no data within the study will be able to be linked back to the participants. There will be no compensation for participation in this study, and results of this study may be published. Participation will be limited to one appointment that will take less than 1 hour.

If you plan to use your employer's computers, email, or other resources, you will need to get your employer's approval to participate in this research.

Those interested and applicable please email Megan Zimmerman at mlz@nist.gov for more information.
