We've already discussed the following question with you but would like to document your answer electronically. If you have any questions about what we're asking please talk to the study staff before responding.

Do you agree to take part in the study?

We are asking you to agree to freeze part of your blood and oral fluid specimens at the CDC for future use. We may use these samples for research in the future. Nothing that could be linked to you will be kept with your blood or oral fluid specimens. We are not sure what studies might be done in the future. They might include standard tests as done at hospitals, tests for HIV or other viruses

I give consent for my blood and oral specimens to be stored at CDC for the future use as outlined above.

I DO NOT give consent for my blood and oral specimens to be stored at CDC for future research.

We will now ask you some questions about sexual experiences you've had in the past 3 months. We only want to know about partners' you had oral, anal or vaginal sex with since 04/08/2015.

Some questions will ask specifically about your sex partners' HIV status and what you did with partners who were HIV positive, HIV negative, and partners whose HIV status you did not know. We know you can't always be sure of a partner's HIV status. Please try to answer the questions based on what you knew and what your partners told you or did not tell you about their HIV status.

We know that it may be difficult to answer some of these questions if one or more of your sex partners do not identify as male or female, or if they are transgender. Except where we ask specifically about transgender partners, please include these sex partners in your responses to the questions about sex with either men or women, whichever you think is most appropriate.

We also know that how people refer to their genitals can be unique and personal. The following questions may use words that don't perfectly fit how you or your partners refer to your bodies. Please answer the questions about specific sex acts the best that you can.

The next questions are about women you had vaginal or anal sex with in the past 3 months. Vaginal sex means you put your penis in her vagina. Anal sex means you put your penis in her butt.

The next three questions are going to ask you about the HIV status (unknown, HIV positive, or HIV negative) of the 3 men with whom you had anal sex without using a condom during group sex in the past 3 months.

How many of these 3 men, with whom you had anal sex without using a condom during group sex, were partners whose HIV status you did not know?

How many of these 3 men, with whom you had anal sex without using a condom during group sex, were HIV positive?

How many of these 3 men, with whom you had anal sex without using a condom during group sex, were HIV negative?

In the next section we will ask you more about the 6 men you had anal sex with.

Please enter a nickname or initials for the 3 most recent men you had anal sex with since 04/08/2015. We do not want to know the names of your partners. Please choose a nickname or initials that you will remember and that will best help you identify that person.
